Heritage at Risk

Historic England

East of England Summary 2016

Historic England has again reduced the number of historic assets on the Heritage at Risk Register, with **412** assets removed for positive reasons nationally. We have seen similar success locally, achieved by offering repair grants, providing advice in respect of other grant streams and of proposals to bring places back into use. We continue to support local authorities in the use of their statutory powers to secure the repair of threatened buildings. Challenges remain. The percentage of buildings at risk which are capable of beneficial use, for example, has risen to its highest ever – 45.7%. This suggests that more usable buildings are beyond economic repair. Skills shortages may be in part to blame, but causes for the shift remain to be fully explored. This trend reinforces the importance of grant aid and of building the confidence of owners and other partners in order to achieve continued success.

John Neale Acting Planning Director, East of England

In the East of England the statistics reflect the national success with an overall reduction of **22** assets and the largest grant spend of any region, with over £1.9m tackling heritage at risk. This has resulted in improvements in condition, removals

from the Register or the development of projects which will ultimately lead to an efficient and successful repair phase in the future.

The region has seen an overall reduction of **9** scheduled monuments, **12** listed buildings and **4** places of worship. These figures take into account additions to the Register over the previous year, so the true number of assets removed is far higher, with **13** scheduled monuments removed, **15** listed buildings and **21** places of worship. We are on target to achieve our objective of 60 entries removed from the 2015 baseline Register by 2018.

In order to achieve this we are increasing our use of funding for capacity building. This year we funded a Project Officer post at **Coalhouse Fort** to oversee the actions set out in a Historic England funded Conservation Management Plan, and to apply for alternative and additional funding sources for the repair phases. This project is a prime example of successful collaborative

working with a local authority partner. We also work in partnership with local authorities to support and underwrite statutory notices on ‘at risk’ sites using the ‘**Stopping the Rot**’ process.

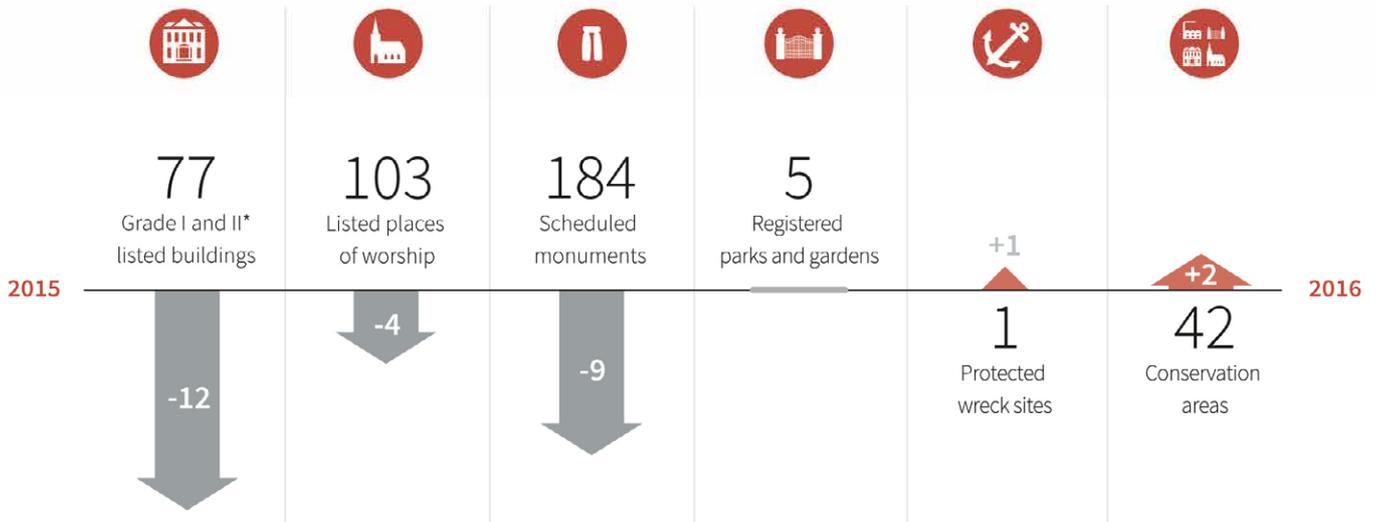

A particular challenge for the year ahead will be **Priory House** in Dunstable. This former priory guesthouse complete with a medieval undercroft, is facing multiple structural issues caused by excess moisture and inappropriate materials used during modern repairs. Work on this site, and others, encompasses new research into the availability, use and effectiveness of **clunch** (a white cretaceous limestone) as a building material.

Our work on archaeological and structural scheduled monuments has once again been successful this year. Particular success has derived from Countryside Stewardship funding in partnership with **Natural England**. Advances in our understanding of arable regimes have allowed the removal of some scheduled monuments from ploughing and arable activity altogether. Successes to be celebrated include repair projects at **Stansted Castle, a substantial Norman ringwork and bailey**, and at Thorney, where a stewardship agreement has seen a **Bronze Age barrow** removed from the plough, ensuring the continued survival of the remaining upstanding 30cm.

Gary Griffin Business Manager

Cover image: Sawston Tannery Drying Shed, grade II*. Built in the mid-19th century, the shed survives as an exceptional example of its type due to its scale and unaltered form. The tannery, still active today, has been on site since at least the 17th century. The arcaded brick ground floor would formerly have housed steeping tanks and the three upper storeys with adjustable louvered ventilators and unencumbered floor space were for skin drying. The shed has long been redundant, but Historic England is seeking a secure future in partnership with the owners and local authority.

Designated assets on the 2016 **East of England Register**

There are **412** assets on the **East of England Register**, **22** fewer than in 2015

Kersey Mill **Ipswich, Suffolk**

Kersey Mill is a grade II* building which was added to the Heritage at Risk Register in 2014, after being in a deteriorating condition for many decades. New owners acquired the building in 2012 and immediately sought for a positive and sustainable solution to the structural issues and overall condition faced by the mill.

John Whitmore and Sons built the original section of the mill in 1810. It was later enlarged in 1868 with the introduction of a steam engine, large bolters (or sieve) and an elevator. This sophisticated array of equipment minimised the need for manual handling and produced fine white flour. The mill has over time been adapted to three main sources and phases of power: water, steam

and then gas. The milling machinery is still virtually complete and capable of sensitive repair and restoration to enable milling once again. The mill also has a fine iron waterwheel and the wheel pit has already been carefully repaired and rebuilt by the current owners.

The building is still substantially original, despite being subject to repairs and renewal over the years. However, a structural survey in summer 2015 discovered that two full-height principal posts, one axial beam and substantial areas of flooring were severely rotted and at risk of collapse. A leaky valley gutter and poor roof covering contributed to the rate of decay. The mill required urgent repair and replacement of these structural elements in order to reinstate structural integrity. A grant of £80,000 towards eligible costs of £101,760 was offered and accepted. The main elements of structural work were completed this summer to a high standard, resulting in a nomination for a Historic England Angel Award. The mill is now open to the public on selected open days.

Coalhouse Fort **Tilbury, Essex**

Coalhouse Fort is a scheduled monument owned by Thurrock Borough Council. Built on the north side of the Thames estuary in 1861-74, it was part of the defences against the potential threat of French invasion. Successive modifications to the fort demonstrate the evolution of defence history and its technologies of ordinance, detection and monitoring from 1861 to 1945 all on one site. These include the installation of gun batteries, observation points, and searchlight and radar installations. A glacis or earth bank was added to the walls facing the river to reduce the prominence and vulnerability of the fort to heavy calibre shell fire.

The various structures on site are suffering increasingly from water ingress and resulting repairs and maintenance have accumulated. The dangerous condition of many areas impedes access and use of the site, while the risk of loss to historic fabric increases.

Now Historic England grant aid will fund a management strategy and emergency repairs. This includes thorough investigation of the causes of deterioration and the

strategies needed to realise the full potential of the site. A Project Officer will be responsible for overseeing immediate repairs, developing funding applications for future repairs to bring areas back into use and strategies to secure a sustainable future for the fort.

50th Anniversary of Conservation Areas

In 2017, Historic England will celebrate the 50th anniversary of conservation areas. These precious historic areas, from urban and industrial to rural and remote, create a strong sense of place and are likely to be what you think of when you think of special local character.

We'll carry out research into people's attitudes towards conservation areas and the challenges they

face in protecting them. We also plan to analyse local authorities' conservation area survey data to better understand what puts conservation areas up and down the country at risk. Finally, at a time when local authority resources are under pressure, we'll ask how local civic groups and organisations can become more involved to help safeguard conservation areas.

Content and criteria

DESIGNATION

Definition

All the historic environment matters but there are some elements which warrant extra protection through the planning system. These are included in the [National Heritage List for England](#) (NHLE), an online searchable database of designated assets. Since 1882, when the first Act protecting ancient monuments and archaeological remains was passed, government has been developing the designation system. Listing, which is applied to buildings, emerged from the post-Blitz 1940s Planning Acts. There are now nearly 400,000 designated assets on the NHLE including listed buildings, scheduled monuments, registered parks and gardens, registered battlefields and protected wreck sites.

Historic England, as the government's expert adviser, is responsible for making recommendations – but it is still the Secretary of State at the Department for Culture, Media and Sport who makes the decisions on whether an asset is designated. Understanding and appreciation develop constantly, which makes keeping the designation base up-to-date a never-ending challenge.

While still responding to threat-driven cases, our approach is now more strategic, based around thematic and area-based projects. Recent developments have seen a greater striving for openness and transparency in the process of designating a site, and better communication of what makes something special.

In June 2016 Historic England launched [Enriching the List](#), a crowdsourcing initiative opening up the entries on the National Heritage List to contributions by users. Anyone can register as a volunteer and submit extra information about one of the assets on the List or submit photographs to illustrate it. This additional content will then be available for anyone to view with but separate from the official List Entry.

Alongside the nationally designated assets found on the National Heritage List for England are locally designated assets. Best known are conservation areas, but local authorities can also create lists of locally valued assets. Most archaeological sites of significance are not scheduled, but rely on local identification and management for their protection.

LISTED BUILDINGS

Listing is by far the most commonly encountered type of designation. A listed building (or structure) is one that has been designated as being of special architectural or historic interest. The older and rarer a building is, the more likely it is to be listed. Buildings less than 30 years old are listed only if they are of very high quality and under threat. Listing is mandatory: if special interest is believed to be present, then the Department for Culture Media and Sport has a duty to add the building to the List.

Listed buildings are graded I, II* and II. Grade I buildings are of outstanding interest, and II* are particularly important buildings of more than special interest; together they amount to 8% of all listed buildings. The remaining 92% are of special interest and are listed grade II.

There are over 376,000 listed entries on the NHLE of buildings of special architectural or historic interest. Entries on the statutory list sometimes group together a number of separate buildings: a terrace will be counted as one entry, rather than as separate units. Entries on this Register reflect how buildings are grouped and recorded on the statutory list.

Structures can occasionally be dual designated (both listed as buildings and scheduled as monuments). In such cases, scheduling controls take precedence.

SCHEDULED MONUMENTS

Scheduled monuments include single archaeological sites and complex archaeological landscapes. Nearly 20,000 examples have been designated because of their national importance. Scheduled monuments are not graded. They cover human activity from the prehistoric era, such as burial mounds, to 20th century military and industrial remains. For the millennia before written history, archaeology is the only testament to innumerable generations of people of whom there is no other record.

The later 20th century saw unprecedented changes to the landscape. As a result, some types of historic site that once were commonplace began to become rare. Those that survive often represent just small islands of what once characterised broad sweeps of our towns and countryside. Although protected by law, scheduled monuments are still at risk from a wide range of processes and intense pressures outside of the planning system. These include damage from cultivation, forestry and, often most seriously of all, wholly natural processes such as scrub growth, animal burrowing and coastal erosion. Scheduling is discretionary, and many archaeological sites of potential importance are not designated. Instead, they are managed through the planning system and other regimes.

REGISTERED PARKS AND GARDENS

There are over 1,600 designed landscapes on the current Historic England Register of Historic Parks and Gardens of Special Historic Interest. These registered landscapes are graded I, II* or II, and include private gardens, public parks and cemeteries, rural parkland and other green spaces. They are valued for their design and cultural importance, and are distinct from natural heritage designations.

Inclusion on the Historic England Register of Historic Parks and Gardens brings no statutory controls, but there is a clear presumption in favour of upholding their significance in government planning guidance, so they do gain protection. Local authorities are required to consult Historic England on applications affecting sites registered as grade I or II*, and the Gardens Trust on sites of all grades. The setting of other designated heritage assets can also protect registered landscapes.

REGISTERED BATTLEFIELDS

Historic England's Register of Historic Battlefields was set up in 1995, and is our youngest category of designation. Its aim is to protect and promote those sites where history was made through military engagement which can be securely identified on the ground. They range from the Battle of Maldon (991) to Sedgemoor (1685): almost half date from the period of the civil wars in the mid-17th century. These special places, where often thousands were killed, deserve our recognition and respect. Recently, additions have been made to the Register of Historic Battlefields for the first time since its creation. There are now 46 registered battlefields.

Protection is needed to prevent encroachment through inappropriate development, or insensitive (and damaging) metal detecting, which can permanently alter the archaeological record. As with registered parks and gardens, there is a clear presumption in favour of protecting registered battlefields in government planning policy.

PROTECTED WRECK SITES

England's 49 protected wreck sites represent a tiny proportion of the 33,000 or so pre-1945 wrecks and recorded casualties that are known to lie in the territorial waters. Wreck sites can be of importance for different reasons: the distinctive design or construction of a ship, the story it can tell about its past, its association with notable people or events and its cargo. The Protection of Wrecks Act 1973 empowers the appropriate Secretary of State to designate a restricted area around a vessel to protect it or its contents from unauthorised interference, and Historic England administers the attendant licensing scheme for divers seeking access.

CONSERVATION AREAS

Conservation areas are designated by local authorities and are areas of particular architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance. For almost 50 years, ever since the 1967 Civic Amenities Act, conservation areas have proved a highly effective mechanism for managing change on an area-wide basis. There are currently nearly 10,000 conservation areas in England including town and city centres, suburbs, industrial areas, rural landscapes, cemeteries and residential areas. They form the historic backcloth to national and local life and are a crucial component of local identity.

Criteria for inclusion on the Register

RISK ASSESSMENTS

Heritage assets included on the Register are risk assessed according to the nature of the site rather than the type of designation. Building or structure assessments are used for secular listed buildings and structural scheduled monuments, typically masonry remains. Archaeology assessments are used for scheduled earthworks and below-ground remains. Thus a scheduled monument may appear on the Register in either or both the building and structure and the archaeology sections depending upon what puts it at risk. Listed buildings that are in use as places of worship are assessed using the places of worship assessment. Registered parks and gardens, conservation areas, battlefields and protected wreck sites have their own assessments because they each have their own particular characteristics and factors that may put them at risk.

BUILDINGS AND STRUCTURES

To be considered for inclusion on the Register, buildings or structures must be:

- designated and included on the National Heritage List for England
- a grade I or II* listed building
- a grade II listed building in London
- a structural scheduled monument with upstanding remains
- in secular (non-worship) use

Buildings or structures are assessed on the basis of condition and, where applicable, occupancy (or use) reflecting the fact that a building which is occupied is generally less vulnerable than one that is not.

Occupancy (or use) is assessed as 'vacant', 'part occupied', 'occupied', 'not applicable', or occasionally, 'unknown'. Many structures fall into the 'not applicable' category for example: ruins, walls, gates, headstones or boundary stones.

Condition is assessed as 'very bad', 'poor', 'fair' or 'good'. The condition of buildings or structures on the Register is typically very bad or poor, but can be fair or, very occasionally, good. This reflects the fact that some buildings or structures are vulnerable because they are empty, underused or face redundancy without a new use to secure their future. Assessing vulnerability in the case of buildings in fair condition necessarily involves judgement and discretion. A few buildings remain on the Register in good condition, having been

repaired or mothballed, but still awaiting a new use or occupancy.

Buildings or structures are removed from the Register when they are fully repaired/consolidated, and their future secured either through occupation and use, or through the adoption of appropriate management.

PLACES OF WORSHIP

To be considered for inclusion on the Register places of worship must be designated and listed grade I, II* or II on the National Heritage List for England, and be used as a public place of worship at least six times a year.

Places of worship are assessed on the basis of condition only. If a place of worship is in very bad or poor condition it is added to the Register. This includes places of worship which are generally in fair or good condition but have major problems with one key element, like the tower.

Historic England has visited and assessed listed places of worship considered to be in poor or very bad condition according to local assessments. Those that are identified as at risk are included on the Register.

Once on the Register, places of worship can move through the condition categories (e.g. from very bad to poor, to fair, even good) as repairs are implemented and the condition improves, until they are fully repaired and can be removed from the Register. This means that there are some places of worship in good condition on the Register but with outstanding issues still to be resolved at the time when they were assessed.

ARCHAEOLOGY

To be considered for inclusion on the Register archaeological sites must be designated as scheduled monuments and included on the National Heritage List for England. Archaeology assessments cover scheduled earthworks and buried archaeology. The risk assessment is based on their condition and vulnerability, the trend in their condition, and their likely future vulnerability. A site's condition is expressed in terms of the scale and severity of adverse effects on it ranging from 'extensive significant problems', to 'minor localised problems'.

Archaeological entries are removed from the Register once sufficient progress has been made to address the identified issues, and a significant reduction in the level of risk has been demonstrated.

PARKS AND GARDENS

To be considered for inclusion on the Register parks and gardens must be designated as grade I, II* or grade II and included on the National Heritage List for England. Parks and gardens are assessed in terms of condition and vulnerability. Steps being taken by owners to address problems are also taken into consideration.

Parks and gardens assessed as being at risk are typically affected by development and neglect. They have frequently been altered by development or are faced with major change. The original function of these landscapes has often changed and divided ownership leads to the loss of their cohesive historic design.

Park and garden entries are removed from the Register once steps have been taken to address issues and positive progress is being made.

BATTLEFIELDS

To be considered for inclusion on the Register battlefields must be designated and included on the National Heritage List for England. Battlefields deemed to be at risk of loss of cultural significance are included on the Register.

The principal risks and threats are:

- development pressure e.g. encroachment of buildings
- pressures of particular use within the site e.g. arable cultivation
- damage e.g. unregulated metal detecting

Battlefields are removed from the Register either when damaging activities cease, are managed, or when threats recede due to effective planning.

WRECK SITES

To be considered for inclusion on the Register wrecks must be designated and included on the National Heritage List for England. Wreck sites are assessed based on their current condition, vulnerability and the way they are being managed.

Wrecks are vulnerable to both environmental and human impacts. Risks that contribute to inclusion on the Register range from unauthorised access to erosion and fishing damage.

The monitoring process ensures that the significance of the site is identified and maintained. In spite of the inherent difficulties in caring for this type of site, careful management must be maintained.

Wrecks are removed from the Register once an appropriate management and monitoring regime is operational.

CONSERVATION AREAS

Historic England has asked every local authority in England to complete (and update as appropriate) a survey of its conservation areas, highlighting current condition, threats and trends. Conservation areas that are deteriorating, or are in very bad or poor condition and not expected to change significantly in the next three years, are defined as being at risk.

The approach taken to assess conservation areas at risk has been refined since the first survey in 2008/2009. The information provides a detailed assessment of each conservation area. An overall category for condition, vulnerability and trend is included for each conservation area on this Register. Conservation areas identified as at risk in 2009, but not reassessed since using the revised methodology, are included on the Register but with limited information.

Conservation areas are removed from the Register once plans have been put in place to address the issues that led to the conservation area being at risk, and once positive progress is being made.

Reducing the risks

One of the primary aims of the Historic England Corporate Plan 2015-2018 is reducing the risk to heritage assets. In order to achieve this aim we are working to:

- better understand the nature and extent of risk
- encourage others to save and re-use heritage at risk
- build the capacity of the sector to deliver solutions for heritage at risk
- provide advice and grants to help remove heritage from the Register

Dedicated Heritage at Risk teams in our nine regional offices are tasked with achieving this aim.

Whilst each type of heritage asset and individual site will require its own approach and solution, there are some general approaches that are relevant to all 'at risk' assets. Finding solutions for heritage at risk requires working in close partnership with owners, local planning authorities and a wide variety of other organisations. The provision of clear advice is essential to further understanding of heritage at risk.

Maintenance and occupation or use (where appropriate) are essential in preventing heritage from becoming at risk. Maintenance of assets already at risk can prevent them from decaying further. Without maintenance, the cost of repair and consolidation escalates the challenge for owners and occupiers increases, and the scope for affordable solutions declines.

The Heritage at Risk Register helps us understand what factors lead to heritage assets becoming at risk, what action is most likely to influence their condition and where resources can be focused to best effect. Historic Environment Records and local heritage at risk registers, maintained by local authorities, are additional repositories of information on local historic assets. They underpin the work of local authority historic environment services and can help improve the protection, conservation and management of heritage assets.

Historic England provides a wide range of published guidance on reducing the risks, including: finding partners, funding, new uses for heritage assets, and enforcing urgent works and repairs. These are available to download from our website, www.historicengland.org.uk. Key publications and guidance are listed on pages XV-XVI.

BUILDINGS AND STRUCTURES

Our nine regional teams can help existing and potential owners, developers and local authorities with the assessment of risk and the identification of appropriate programmes of repair. They can advise on the benefits

of additional survey and assessment, help with feasibility studies and with brokering solutions. In particularly difficult cases, they can draw on the additional expertise of our national advisers specialising in structural engineering, quantity surveying, development economics, enforcement and planning law.

Historic England can help with access to funding. We have two principal grant streams ourselves: Repair Grants for Heritage at Risk for all asset types and Section 17 Management Agreements which are smaller grants for scheduled monuments. More information on funding can be found on the [Historic England](http://Historic England website) website. The support of other grant providers, including the Heritage Lottery Fund and Natural England, is also critical.

We know how useful our own Register is in managing risk, prioritising action and engaging partners. We are therefore working with local authorities to encourage them to develop strategies for tackling buildings in poor condition. These strategies should include the use of enforcement powers; '[Stopping the Rot](#)' is our published guidance on this. Our Heritage at Risk Solicitor can provide training and support for local authorities considering enforcement action. In certain circumstances we can also provide [grant aid](#) to underwrite the cost of serving Urgent Works and Repairs Notices.

Building preservation trusts (BPTs) offer a tried and tested way of saving buildings at risk. We have close links with the [Architectural Heritage Fund](#) and fund their regional support officers to work across the country. They help BPTs and other not-for-profit organisations to access funding, carry out feasibility studies and develop solutions for buildings at risk. The [Heritage Network Trust](#) also provides information about support officers and BPTs. Guidance and case studies are available on the [Historic England](#) website.

PLACES OF WORSHIP

Regular maintenance helps to keep all buildings in good condition but those suffering major problems need repairs to minimise the risks to both the structure and the contents. Keeping drains and gutters clear so that water is taken away from the building efficiently is the most important thing congregations can do as this stops small problems developing into unnecessary crises. The overflowing gutter soon soaks the wall beneath, rots the roof timbers behind it and makes the whole building vulnerable.

In some areas congregations group together to engage reputable contractors at competitive rates to clear gutters and rainwater goods. Such cooperation enables them to get good quality work

carried out at reasonable prices by firms that understand historic buildings. The [Maintenance Cooperatives Project](#) run by the Society for the Protection of Ancient Buildings helps to connect, inform and empower those people who look after places of worship. Other successful initiatives include the Yorkshire Maintenance Project run by the National Churches Trust.

The Heritage Lottery Fund runs the [Grants for Places of Worship](#) scheme. The main focus of the scheme is fabric repairs but it also provides funds for modest changes to enhance community use of the building. Historic England's architects and surveyors, based in our regional Heritage at Risk teams, provide technical advice to the Heritage Lottery Fund on fabric repairs to ensure appropriate conservation standards are met.

The Government's [Listed Places of Worship scheme](#), enabling the reclaiming of VAT on eligible repairs, maintenance and authorised alterations, is available to all listed places of worship, whether they have obtained grants or are funding work themselves. Local and national charities also offer grants.

Historic England supports congregations wanting to keep their places of worship in use and recognises the need for appropriate new facilities such as kitchens and toilets that are sensitive to the building's special character. [New Work in Historic Places of Worship](#) helps congregations understand how changes can be achieved.

A network of support officers, employed locally but part funded by Historic England, offers direct advice and encouragement to congregations. Projects to effect repairs and develop necessary new facilities for both the community and visitors are breathing a new lease of life into these treasured parts of our heritage.

ARCHAEOLOGY

The excellent progress which is being made with reducing the number of scheduled monuments on the Register continues to demonstrate the value which owners and land managers are placing upon the positive management of archaeological sites.

The large majority of the 19,850 scheduled monuments in England are on land classified as agricultural. Effective information sharing with Natural England and Defra is therefore of great importance for prioritising management action and for targeting agri-environment grant schemes to best effect. This has been especially important under the new Countryside Stewardship Scheme, under which the first agreements commenced in January 2016. Historic England, Natural England and local authority curators have collaborated on developing a new web portal for the scheme which provides local advice to support landowner applications. Our work in partnership with

Natural England on agri-environment schemes has removed 778 scheduled monuments from the Register since 2009. We also continue to work closely with the Heritage Lottery Fund to identify the nationally important monuments deserving of grant-aid for enhanced conservation, presentation and access projects.

Loss and damage as a consequence of arable cultivation remains the greatest source of risk to scheduled monuments on the Register. The Conservation of Scheduled Monuments in Cultivation (COSMIC) project has provided updated risk assessments for all sites affected by arable cultivation on the Register. It provides bespoke recommendations for each monument, enabling cultivation to continue where it does not present a risk. It will also be an important tool for advising owners on the longer term management of their monuments as the existing ten year Environmental Stewardship agreements gradually expire.

Although great progress has been made, analysis of entries on the Register shows that prehistoric barrows continue to be one of the most 'at risk' types of archaeological site on the Register. Unmanaged woodland, tree, scrub and bracken growth remains one of the most widespread causes of long-term damage to both urban and rural archaeological sites - even if the effects are not as visible or as immediately destructive as other processes. In most cases simple, low cost but regular maintenance is the key. The delivery of this will always be reliant upon the help and goodwill of landowners.

PARKS AND GARDENS

Although a statutory list, the Register of Historic Parks and Gardens of Special Historic Interest in England in itself brings no additional statutory powers, instead it is used in the development control process to provide a valuable tool for the protection of the sites it includes. The Government's National Planning Policy Framework (NPPF) stresses the desirability of sustaining and enhancing the significance of all heritage assets and finding viable uses consistent with their conservation.

The NPPF states that great weight must be given to the conservation of sites included on the Register of Historic Parks and Gardens of Special Historic Interest and that substantial harm or loss of such features can only be justified in exceptional cases.

A great many historic parks and gardens are either privately owned or held in trust. In addition, local authorities are responsible for nearly all the public parks and cemeteries in our towns and cities.

Registered parks and gardens are typically large, complex heritage assets, many of them in multiple ownership. It can take years to identify and implement proposals to improve their condition and trajectory. To help reduce the risks, Historic England encourages and works with owners to develop conservation management strategies. Landscape architects working in our Heritage at Risk teams can help tailor conservation management plans and funding packages for individual landscape features or whole sites. We work with partners, such as Natural England and the Heritage Lottery Fund, to help source funding to secure sustainable futures for parks and gardens at risk.

BATTLEFIELDS

As with registered parks and gardens, the Register of Historic Battlefields brings no additional statutory controls to registered battlefields, but the National Planning Policy Framework makes it clear that registered battlefields are of equal significance to scheduled monuments, buildings listed grade I and II*, registered parks and gardens and protected wreck sites. Therefore, the positive conservation and management of registered battlefields is a core element of current heritage legislation.

Historic England continues to work with owners to develop management plans for registered battlefields and, in appropriate cases, contribute towards the cost of management plans. We work to develop positive landscape strategies with owners and partners such as Defra through Environmental Stewardship schemes. In some circumstances, we may encourage the conversion from arable to pasture of especially sensitive locations to protect battlefield archaeology from the effects of ploughing and as part of a wider drive to prevent unauthorised or damaging metal detecting.

Historic England also continues to encourage greater access to battlefields and the improvement of their amenity value and visitors' understanding of the impact these dramatic historic events had on our development as a nation.

Local authorities can also invite comments from the Battlefields Trust on planning applications affecting the setting of registered battlefield sites.

WRECK SITES

At the strategic level, the major sources of risk to protected wreck sites have been identified. In terms of high priority sites, practical requirements have also been implemented through conservation management plans and appropriate intervention.

Risks to protected historic wreck sites can often be reduced through education, provision of marker buoys, or planning policies that take full account of their

national importance. However, some sites require significant resources to stabilise their condition or to carry out detailed archaeological assessments of their conservation requirements. Although Historic England has statutory power to allocate funds to promote the preservation and maintenance of protected wreck sites, its financial resources can solve only a small proportion of the problems.

In spite of the inherent difficulties with caring for this type of site, careful management must be maintained if we are to avoid the loss of wreck sites. It is therefore close cooperation between the owners of protected wreck sites (where known), authorised divers and all organisations charged with care for the marine and coastal environment, that will make the real difference to their long term survival.

Practical advice on the management of historic wreck sites, whether at the coast edge or under water, is available from [Historic England](#).

CONSERVATION AREAS

Looking after conservation areas is a responsibility shared by those of us who live, work or do business in them as well as those of us whose job it is to manage them or make decisions about their future.

The reasons conservation areas become at risk are difficult to address as they can cover large areas of land; they include streets, spaces, archaeology and trees as well as buildings and structures and therefore involve many different owners and approaches to management.

Local authorities complete the Conservation Areas Survey, providing us with an understanding of what is particularly affecting the character and appearance of conservation areas, what is working well or what is putting them at risk. Strong planning policies, guidance and a clear management strategy for individual conservation areas, backed up by effective enforcement, are all critical in managing change in these areas. Local authorities across the country continue to see their resources reduced, and this is making their task more difficult to deliver. Armed with the information provided by conservation area surveys, we, local authorities and other partners will have the evidence to direct resources much more accurately towards those conservation areas at greatest risk.

There are opportunities for members of the local community to get involved with protecting and enhancing their conservation area, either individually or through groups. Some local groups have helped to prepare character appraisals and management plans for conservation areas whilst others have carried out their own assessments to identify management issues.

Key statistics

BUILDINGS AND STRUCTURES

- Nationally, 3.8% of grade I and II* listed buildings (excluding places of worship) are on the Register. In the East of England the percentage is 2.3% (77 listed secular buildings).
- 19 building or structure entries have been removed from the 2015 East of England Register because their futures have been secured, and 7 have been added.
- 61.1% of buildings or structures (66) on the East of England baseline 1999 Register have been removed because their futures have been secured, compared with the national figure of 61.2%.

PLACES OF WORSHIP

- Nationally, 6.3% of listed places of worship are on the Register. In the East of England, 4.4% (103) are on the Register.
- 21 places of worship have been removed from the East of England Register following repair work, and 18 have been added.

ARCHAEOLOGY

- 2,528 (13.9%) of England's 19,848 scheduled monuments are on the Register. 184 (10.6%) of the East of England's 1,732 scheduled monuments are on the Register.
- 9 archaeology entries have been removed from the 2015 East of England Register for positive reasons, and 3 have been added.
- 40.4% of archaeology entries (82) on the East of England baseline 2009 Register have been

removed for positive reasons, compared with the national figure of 42.2%.

- Nationally, damage from arable cultivation is the greatest cause of risk affecting 39% of archaeological entries on the Register. In the East of England the proportion is 73.2%.

PARKS AND GARDENS

- 95 (5.8%) of England's 1,639 registered parks and gardens are on the Register. Of the 215 registered parks and gardens in the East of England, 5 (2.3%) are on the Register, the same as last year.

BATTLEFIELDS

- Of the 46 registered battlefields in England, 6 (13.0%) are on the Register. The only registered battlefield in the East of England is not on the Register.

WRECK SITES

- Of the 49 protected wreck sites around England's coast, 6 (12.2%) are on the Register. The East of England's single protected wreck site is on the Register.

CONSERVATION AREAS

- 8,286 of England's 9,848 conservation areas have been surveyed by local authorities and 496 (6.0%) are on the Register. Of the 1,209 conservation areas in the East of England, 894 have been surveyed and 42 (4.7%) are on the Register.
- 2 conservation areas have been added to the 2015 East of England Register.

HISTORIC ENGLAND FUNDING

- £1.7 million in grant was spent on 28 entries on the East of England Register during 2015/16.

Risk assessments of heritage assets are based on the nature of the site. Buildings and structures include listed buildings (excluding listed places of worship) and structural scheduled monuments; archaeology assessments cover earthworks and buried archaeology.

Publications and guidance

Historic England has produced the following publications relating to heritage at risk, including:

[Assessment of Heritage at Risk from Environmental Threat: Key Message](#) (2013)

[Caring for Places of Worship 2010](#) (2010) – a report on the condition of England's listed places of worship and the needs of the congregations

COSMIC 3 – *Grappling with a 140-Year-Old Conservation Problem* (2014) – [Historic England Research News 21](#), available online

[Counting our Heritage: a Heritage at Risk Survey for High Peak Staffordshire Moorlands by Community Volunteers](#) (2013)

[Heritage at Risk 2010 – Report](#) (2010)

[Heritage at Risk: Conservation Areas](#) (2009)

[Heritage at Risk 2016 – national summary leaflet](#) and [regional summary leaflets](#) for: East Midlands, East of England, London, North East, North West, South East, South West, West Midlands, and Yorkshire

[Heritage at Risk Online Register](#) – detailed listings for: East Midlands, East of England, London, North East, North West, South East, South West, West Midlands, and Yorkshire can be downloaded from our website or viewed on an interactive database.

[How to Assess the Condition of Historic Buildings](#) – an on-line introduction to assessing condition.

[Monuments at Risk \(2008\)](#) – summary of scheduled monuments at risk for: East Midlands, East of England, London, North East, North West, South East, South West, West Midlands, and Yorkshire

[Vacant Historic Buildings: An Owner's Guide to Temporary Uses, Maintenance and Mothballing](#) (2011)

HERITAGE AT RISK ON THE WEB

To find out more about the Heritage at Risk programme visit [Heritage at Risk](#) where you will find an interactive database providing detailed information on all heritage sites at risk nationally.

Details of all nationally designated historic places in England are available in one place on the [National Heritage List for England](#) online database. Further information about the different classes of designated heritage assets, including listed buildings, scheduled monuments, registered parks and gardens, registered battlefields and protected wreck sites can be viewed at the same address.

CONSERVATION POLICIES AND GUIDANCE

The following publications are among the numerous guidance documents available on our website – [Historic England Publications](#).

[Caring for Historic Graveyard and Cemetery Monuments](#) (2011)

[Caring for Our Shipwreck Heritage: Guidelines on the First Aid Treatment and Conservation Management of Finds Recovered from Designated Wreck Sites Resulting from Licensed Investigations](#) (2012)

[Caring for Places of Worship](#) (2010) – a practical booklet for everyone involved in caring for England's listed places of worship

[Conservation Area Designation, Appraisal and Management](#) (2016)

[Conservation Principles, Policies and Guidance for the Sustainable Management of the Historic Environment](#) (2008)

[Conservation and Management of War Memorial Landscapes](#) (2016)

[The Conservation, Repair and Management of War Memorials](#) (2015)

[Constructive Conservation in Practice](#) (2008)

[Constructive Conservation: Sustainable Growth for Historic Places](#) (2013)

[Shared Interest: Celebrating Investment in the Historic Environment](#) (2006)

[Theft of Metal from Church Buildings](#) (2011)

[Valuing Places: Good Practice in Conservation Areas](#) (2011)

Key to the entries

The Register includes the following risk assessment types:

- Building or structure
(grade I and II* listed buildings, grade II listed buildings in London and structural scheduled monuments)
- Place of worship
(grade I, II* and II listed buildings)
- Archaeology
(scheduled monuments – earthworks and buried archaeology)
- Park and garden
(Registered parks and gardens)
- Battlefield
(Registered battlefields)
- Wreck site
(Protected wreck sites)
- Conservation area
(Conservation areas)

Details are given here for all risk assessment types even if entries are not present in the Regional Register.

ORDER

Entries are grouped and ordered alphabetically, first by County (dark grey bands) or Unitary Authority (light grey bands), and then by Local Planning Authority (National Park/Unitary Authority/District or Borough).

A blank band denotes the end of a county and the beginning of a unitary authority.

Sites that straddle more than one local planning authority are included under the lead authority.

Within each planning authority, entries are grouped by risk assessment type in the following order:

- Buildings or structures
- Places of worship
- Archaeology
- Parks and gardens
- Battlefields
- Wreck sites
- Conservation areas

Within each risk assessment type, entries are ordered alphabetically by parish, locality and street/site name (except for conservation areas and protected wreck sites which are ordered by site name only).

DESIGNATION

The principal designation is noted for each entry and includes:

- Listed Building (LB) grade I or II*
- Listed Place of Worship grade I, II* or II
- Scheduled Monument (SM)
- Registered Park and Garden (RPG) grade I, II* or II
- Registered Battlefield (RB)
- Protected Wreck Site (PWS)
- Conservation Area (CA)

Other designations that apply to the designated site, including location within a World Heritage Site (WHS), are also noted.

If an entry is dual designated (both listed and scheduled), 'and' rather than a comma is used (eg 'Scheduled Monument and Listed Building grade I'). If a scheduled monument entry is dual designated with a number of listed buildings, each is separated by a semicolon.

The National Heritage List Entry Number is included for all entries (except conservation areas). If a site is dual designated, all relevant List Entry Numbers are noted.

CONDITION

For buildings (including places of worship), condition is graded as: 'very bad', 'poor', 'fair' and 'good'.

For sites that cover areas (scheduled monuments (archaeology assessments), parks and gardens, battlefields and wreck sites) one overall condition category is recorded. The category may relate only to the part of the site or monument that is at risk and not the whole site:

- extensive significant problems
- generally unsatisfactory with major localised problems
- generally satisfactory but with significant localised problems
- generally satisfactory but with minor localised problems
- optimal
- unknown (noted for a number of scheduled monuments that are below-ground and where their condition cannot be established).

For conservation areas, condition is categorised as: 'very bad', 'poor', 'fair' and 'optimal'.

If a site has suffered from heritage crime it is noted in the summary. Heritage crime is defined as any offence which harms the heritage asset or its setting and includes arson, graffiti, lead theft and vandalism.

OCCUPANCY/USE

For buildings (excluding places of worship) that can be occupied or have a use, the main vulnerability is vacancy or under-use. Occupancy (or use) is noted as follows:

- vacant
- part occupied
- occupied
- unknown
- not applicable

VULNERABILITY

Principal vulnerability is noted for archaeology assessments and may relate only to the part of the site that is at risk, and include:

- animal burrowing
- arable ploughing
- coastal erosion
- collapse
- deterioration – in need of management
- scrub/tree growth
- visitor erosion

For parks and gardens, battlefields, wreck sites and conservation areas, vulnerability is noted as high, medium or low.

PRIORITY CATEGORY

Priority for action is assessed on a scale of A to F, where 'A' is the highest priority for a site which is deteriorating rapidly with no solution to secure its future, and 'F' is the lowest priority.

For buildings and structures and places of worship the following priority categories are used as an indication of trend and as a means of prioritising action:

- A Immediate risk of further rapid deterioration or loss of fabric; no solution agreed
- B Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented
- C Slow decay; no solution agreed
- D Slow decay; solution agreed but not yet implemented
- E Under repair or in fair to good repair, but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use)
- F Repair scheme in progress and (where applicable) end use or user identified; or functionally redundant buildings with new use agreed but not yet implemented.

For battlefields and wreck sites the following priority categories are used as a means of prioritising action:

- A No action/strategy identified or agreed (where trend is declining or unknown)
- B Action/strategy agreed but not yet implemented (where trend is declining or unknown)
- C No action/strategy identified or agreed (where trend is stable or improving)
- D Action/strategy agreed but not yet implemented (where trend is stable or improving)
- E Monitoring as appropriate (any trend)
- F Action implemented/strategy underway/scheme in progress (any trend)

Previous year priority categories are given in brackets, otherwise 'New entry' is noted.

'New entry – re-assessed' indicates an existing site on the Register that has been re-assessed using a different risk assessment methodology and is included on this year's Register under the new assessment type.

TREND

Trend for archaeology entries, parks and gardens, battlefields and wreck sites may relate only to the part of the site that is at risk and is categorised as:

- declining
- stable
- improving
- unknown

For conservation areas trend is categorised as:

- deteriorating
- deteriorating significantly
- no significant change
- improving
- improving significantly
- unknown

OWNERSHIP

A principal ownership category is given for each entry, and if sites are in divided ownership, a 'multiple' ownership category is noted.

CONTACT

This is the member of the Historic England local team who acts as a first point of contact for the case, and to whom enquiries should be addressed.

For conservation areas, the contact is the conservation/planning officer at the relevant local planning authority (indicated by 'LPA').

We are not in any sense agents for the owners of the sites included, but we will endeavour to put people in touch with them where appropriate.

SITE NAME:	Parish Church of All Saints, High Street, Turvey
DESIGNATION:	Listed Place of Worship grade I, CA
CONDITION:	Poor
PRIORITY CATEGORY:	F (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1039598

Medieval parish church with additions and alterations 1852-1854 by Sir George Gilbert Scott. "The finest mid-Victorian ecclesiastical ensemble in Bedfordshire" (McHardy). West part of the nave and the base of the tower has remains of Saxon work. The nave is mainly C13 with the north arcade added early C14 and the nave extended. Most of the windows were reworked by Scott. South aisle roof leaking badly over early C14 wall painting of the crucifixion. A Heritage Lottery Fund Grants for Places of Worship grant was accepted and repairs commenced in 2016.

CAMBRIDGE

© Historic England

SITE NAME:	Church of St Clement, Bridge Street, Cambridge
DESIGNATION:	Listed Place of Worship grade II*, CA
CONDITION:	Poor
PRIORITY CATEGORY:	B (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1126262

The exterior of this church is dominated by the early C19 tower in a thin, Commissioners' Gothic style. The nave and aisles are externally entirely early C16, and the brick chancel is distinctively C18. There is a distinctive mix of building materials and blocked openings in the pre-C19 work. Church shared by Church of England and Greek Orthodox congregations. South aisle roof in particularly poor condition with significant water penetration.

HUNTINGDONSHIRE

© Historic England

SITE NAME:	Great Gransden Windmill, Great Gransden
DESIGNATION:	Scheduled Monument, LB grade II*
CONDITION:	Poor
OCCUPANCY:	Vacant/not in use
PRIORITY CATEGORY:	E (C)
OWNER TYPE:	Local authority
LIST ENTRY NUMBER:	1006820

Constructed c1612, Great Gransden is allegedly, the oldest remaining mill in England. Building contains a flour dressing machine with the inscription 'IL 1774 RW'. A comprehensive survey shows that the mill is in poor condition. Consent for emergency repairs was granted, including dismantling of sails for safety reasons, in late 2013. Some emergency works completed in 2014. Historic England grant offered and repair work commenced in May 2016. Discussions on-going regarding formation of local Trust.

SITE NAME:	St Andrew's Church, Church End, Wood Walton
DESIGNATION:	Listed Building grade II*
CONDITION:	Poor
OCCUPANCY:	N/A
PRIORITY CATEGORY:	C (C)
OWNER TYPE:	Charity (heritage)
LIST ENTRY NUMBER:	1130123

Former church with C13 south arcade of nave, C14-C15 west tower, C14 chancel, C16 north arcade much rebuilt 1856-9. Coursed limestone rubble, limestone dressings, plain tile roof. Very isolated. High level repairs were completed to tower and roofs in 2013. Building still thought to be moving and currently undergoing structural monitoring. We are not aware of any changes in this situation.

SOUTH CAMBRIDGESHIRE

© Historic England

SITE NAME:	Little Chishill Mill, Barley Road, Great and Little Chishill	Post mill, possibly rebuilt 1819, scratching on stud 1712, main post renewed 1868 and dated underneath mill. Patent sails c1912-16 replacing former canvas covered sails. Timber-framed, weather boarded and painted with brick piers. The main structure extends to the rear housing the bolter; restored fantail on ladder. The mill was last used in 1951, and was repaired in 1966. The buck is leaking and requires new weatherboarding. Mill transferred to the Great Chishill Windmill Trust who are preparing to carry out external repairs to the buck.

SITE NAME:	Parish Church of St Swithun, Barley Road, Great and Little Chishill
DESIGNATION:	Listed Place of Worship grade II*
CONDITION:	Fair
PRIORITY CATEGORY:	A (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1128142

C13 nave and chancel. Late C14 south aisle. C15 tower. Tower collapsed in 1892; rebuilt 1897, at which time the nave and aisles were restored by F E Penrose. Early C20 vestry and organ chamber. Repairs including stabilising south porch and part renewal of drainage completed 2014. However, water ingress and possible on-going movement over tower arch is causing on-going decay to stonework internally, with cracking in other parts of church. Funding from the Heritage Lottery Fund Grants for Places of Worship has been offered and the works are currently in the development phase.

Parish church rebuilt after a fire in 1466, with further restorations in 1864 and 1920. Construction materials consist of Fieldstone, clunch rubble and dressings of clunch and limestone with a tiled roof. West tower, nave and chancel. Serious structural movements. A Heritage Lottery Fund Grants for Places of Worship grant was offered in 2015 for repairs to north slopes of chancel and nave roofs, high level masonry and north porch. Repair works underway.

C18, cement rendered C19. Mansard Welsh slated roof. 2 storeys and attic. 4 round-headed windows with archivolt and keystones. Red brick, stone dressings and in-and-out quoins. Pedimented Roman Doric door case. On site of Priory guesthouse. Contains complete medieval clunch undercroft from former guesthouse and some pre-Georgian cellars. Complex structural movement and dampness issues. Following reconnaissance survey and detailed advice from Historic England, the Town Council have been awarded a Heritage at Risk grant for a detailed study to examine condition and find solutions.

DESIGNATION: Listed Building grade II*

CONDITION: Poor

OCCUPANCY: Vacant/not in use

PRIORITY CATEGORY: B (New entry)

OWNER TYPE: Private

LIST ENTRY NUMBER: 1123325

A timber-framed water mill with an integral dwelling thought to date to the mid-late C18. The mill building is little altered, and retains its water wheel, primary and secondary gearing and the great majority of its milling machinery. The water management system on the site is also unaltered making this ensemble of buildings, machinery and watercourses an extremely rare survival. Continuing concern over condition of mill. Local Authority monitoring.

DESIGNATION: Listed Place of Worship grade I

CONDITION: Very bad

PRIORITY CATEGORY: F (F)

OWNER TYPE: Religious organisation

LIST ENTRY NUMBER: 1169675

Church on an early manorial site, with Saxon fabric surviving in the nave. The interior has several monuments, and wall paintings are believed to be present below later limewash. The plain tiled roofs are deteriorating; many have slipped, fractured and delaminated, especially on the north side. Daylight is visible from inside through the chancel roof. A Heritage Lottery Fund Grants for Places of Worship grant to re-roof the nave and chancel was awarded in 2016. The project development stage is underway.

SITE NAME: **Church of St Mary, Church Road, Ovington**

DESIGNATION: Listed Place of Worship grade II*

CONDITION: Poor

PRIORITY CATEGORY: A (New entry)

OWNER TYPE: Religious organisation

LIST ENTRY NUMBER: 1277192

This church dates from the C12, with C14, C15, and C16 alterations. The continuous nave and chancel roof is tiled, and has a canted plaster ceiling. There is outward movement and cracking in the north and south walls. Deformation in the roof structure and discontinuity between it and the wall plates, cracking in the ceiling, and wind-driven rainwater penetration of the roof slopes are probably causing progressive failure of the battens and tile fixings.

SITE NAME: **Parish Church of All Saints, The Street, Stisted**

DESIGNATION: Listed Place of Worship grade I, CA

CONDITION: Very bad

PRIORITY CATEGORY: D (F)

OWNER TYPE: Religious organisation

LIST ENTRY NUMBER: 1123870

Parish church of C12 origins, with C13 and C14 additions. Some C19 restoration. A very unusual plan; the tower abutting the south side of the nave, leaving the west end as an uninterrupted symmetrical composition. Cedar shingles to the tower are in poor condition with daylight visible from inside. Masonry of tower buttresses poor, as is the nave roof, with visible decay in the rafter feet and wallplate. A Heritage Lottery Fund Grants for Places of Worship grant was accepted in February 2014. The project is in development stage.

Contact: Malcolm Starr 01223 582723

A largely mid-C19 church with some medieval features surviving internally. Nave and chancel roofs show signs of batten failure and on-going tile losses. Patching has been completed using concrete plain tiles to rear of tower, on chancel verge and elsewhere. Probable batten and tile fixing failure resulting in continuing losses of tiles. Nave and chancel require re-roofing. Church has received a Listed Places of Worship Roof Repairs grant to re-roof the nave and chancel.

This stuccoed two storey building is a late C19 rebuild of a C18 house. It has a parapet extending round a compassed window and a peg-tiled roof surmounted by two tall elegant red brick chimneys. The building suffers from serious chronic problems resulting from water penetration and inadequate ventilation that led to critical dry rot. The building is currently undergoing conversion to apartments under a recent change of ownership

CONDITION:	Very bad
OCCUPANCY:	Part occupied/part in use
PRIORITY CATEGORY:	D (C)
OWNER TYPE:	Private
LIST ENTRY NUMBER:	1123776

Former Elizabethan courtyard house completed in 1569, but the south range was demolished in 1740 and the east range rebuilt in the C19. The house suffers from major structural problems and is extensively propped internally. In recent years the owners have stabilised the building, brought parts into use and carried out some repairs, but comprehensive works are still required. The condition of the garden walls and the main roofs are of particular concern. Historic England has offered a grant towards project development and the consultants are now producing a scheme.

EAST HERTFORDSHIRE

© Historic England

SITE NAME:	Remains of old church tower of St Mary and All Saints Church, Thundridge	Ruinous C15 west tower belonging to the C11-C12 church of St Mary and All Saints. Flint rubble with some dressings; a Romanesque doorway has been reset within the blocking of the chancel arch. The church was demolished in 1853, and only the three-stage tower remains substantially above ground. The building is suffering from decay, vandalism and anti-social behaviour. During 2015-16 repeated works to prevent access to the interior of the tower have resulted in increasingly damage. In redundancy process, discussions with diocese and the local authority continue over long term future.

Knebworth House comprises one wing of a C16 courtyard house remodelled in lavish neo-Tudor style in the mid C19. This later external work was in very poor condition for many years, and despite a major campaign of work some years ago with English Heritage grant aid, much remains to be repaired. A further phase of Historic England grant-aided work was completed in 2015.

Ruined remains of a small C14 two-cell church with bellcote. Built of flint rubble with stone dressings, plastered externally. Probably a ruin by end of C17. Church was dedicated to St Nicholas. Inspection showed loss of voussoirs from openings and general erosion of fabric which requires consolidation. Discussions with Parochial Church Council and diocese regarding repairs took place in 2013 but there has been no further progress on repair since.

OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1342548

Parish church. Built by Sir Hugh Hastings between 1330 and 1347 replacing an earlier church of which a small fragment of walling survives in west wall of nave. West tower, exceptionally wide aisleless nave with north and south porches. High level masonry, roofs and rainwater goods failing. A Historic England and Heritage Lottery Fund Repair Grant for Places of Worship grant for work to south side was completed in 2014. Outstanding items include windows and the internal environmental conditions which threaten the important rood screen, a solution to which is yet to be agreed.

OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	I077227

Parish church. The C15 tower is partially demolished and the two western most bays of the nave and south aisle are roofless. The two most western north aisle bays have been demolished except for the west wall. The present entrance is to the west in the brick wall dividing the roofed church in use from the ruin. A corrugated roof covers the south aisle, while the nave is roofed in plain tile. Roof is leaking with damp penetration in aisles. Vegetation growth is also an issue.

SITE NAME:	Church of St Mary, Sporle with Palgrave
DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Very bad
PRIORITY CATEGORY:	A (New entry)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	I169820

Parish church, medieval and later. Flint with ashlar and some brick dressings. West tower, aisled nave; chancel flanked by extension of north aisle. C13/14 W tower with angle buttresses and a rectangular stair projection to south east. Remains of a C15 parclose screen and a late medieval cyclical wall painting in south aisle. The building has been the victim of heritage crime and parts of the roof have a temporary plastic covering.

Large Augustinian priory with extensive standing remains (circa 1135). A masonry collapse in early 2005 from what appears to be the ruins of the east range of the cloister damaged other stonework which is now vulnerable to further loss. A prioritised schedule of works has been agreed and it is hoped that consolidation and repairs can commence in 2016.

OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1211336

Benedictine Priory founded 1095, now parish church known as Kings Lynn Minster. Rebuilt during C13, altered continuously since. Limestone. Lead roofs. Twin west towers, nave, aisles, transepts with crossing tower, aisled chancel. West front with central arched door under crenellated surround. An application for a Heritage Lottery Fund Grants for Places of Worship grant was made in 2016 to support repairs to decaying high level masonry and Roman Cement to West end and West Towers. HLF grant applied for summer 2016.

PRIORITY CATEGORY:	B (B)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1342382

Parish church of C14 and C15 date with restorations in 1878 by Sir George Gilbert Scott. Constructed from rubblestone, carstone and part rendered. Slate roofs. Masonry of the tower, south aisle, and chancel deteriorating badly. Ineffective ground drainage is making the interior damp and places the historic pews at risk. A Heritage Lottery Fund Repair Grants for Places of Worship has been offered for all these repairs. Work is expected to begin summer 2016.

The gasworks produced town gas from 1825 until 1965 and is now the only remaining town gas works of its kind in England. Acquired in 1983 and repaired, it was opened as a museum in 1989. Damp and ground movement are causing structural weakness to key industrial buildings and machinery. Corrosion of metalwork and metal components. Major issues surround the retort housing and its ashpit.

SITE NAME:	Church of St Mary, Church Lane, Holt, Baconsthorpe
DESIGNATION:	Listed Place of Worship grade II*, CA
CONDITION:	Fair
PRIORITY CATEGORY:	C (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1049847

Parish church dating to 1260. Fine interiors, important monument to William Heydon dated 1593. Tower rebuilt 1740 after collapse. North side very damp. A jointly funded Historic England and Heritage Lottery Fund Repair Grants for Places of Worship grant was offered in December 2011 for repairs which are now completed. However, excess dampness still affects the building throughout and inadequately weathering copings on south aisle are putting this C16 monument at risk. The gutters to the nave and aisles leak and the below ground drainage is ineffective.

DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Poor
PRIORITY CATEGORY:	A (New entry)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1170258

Church with early C14 nave; later C14 chancel; early C15 tower. Restorations in C18 and C19. Walls: whole flints with ashlar dressings. Roofs: slated nave; thatched chancel. The rainwater gutters are undersized and incorrectly positioned causing rainwater to fall onto the walls and on to buttress tops and window tracery. There is excess salt migration, algae growth and damage to early internal plasterwork. The pammments (floor tiles) in the chancel are damp, all of which are indicative of failed above-and below-ground drainage systems. The mullions of the tower west window are falling apart.

NEW ENTRY?:	No
OWNER TYPE:	Private
LIST ENTRY NUMBER:	1001022

Early C18 park and woodland designed as a collaboration between Thomas Ripley, Charles Bridgeman and Horatio Walpole, surrounding an early C18 Palladian mansion with mid-C19 gardens laid out by William Sawrey Gilpin. The park is a Country Park with a focus on wildlife management, some fields arable others pasture. Loss of definition of lake margins. Some replanting of clumps to west and avenue to north of house. Built structures in very poor condition, Peach House in kitchen garden particularly vulnerable.

DESIGNATION:	Listed Place of Worship grade II*, CA
CONDITION:	Poor
PRIORITY CATEGORY:	B (New entry)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1280186

The Octagon Chapel is a former Presbyterian Chapel, now Unitarian Chapel. Built 1756 by Thomas Ivory. Red brick. Pantile roof. Octagonal plan. Single storey with gallery. Central door with semi-circular arch and moulded surround. Single-storeyed pedimented portico with for unfluted Ionic columns and two pilasters. The door is flanked by sash windows with glazing bars and rubbed brick segmental arches. Roof leaks. A Heritage Lottery Fund Grants for Places of Worship grant was awarded in the autumn 2015 and the project development stage is underway in 2016.

DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Poor
PRIORITY CATEGORY:	C (New entry)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1050695

Medieval parish church restored in C19. Comprises nave, south aisle; north porch, fine late C13 chancel, and mid C18 mausoleum on northern side of chancel. Rainwater gutters and downpipes causing severe deterioration on chancel north wall, also placing at risk the remains of a very significant fine C16 terracotta monument, similar in style and design to those in Oxborough church, commissioned by the Bedingfield family. First phase of a Heritage Lottery Fund Grants for Places of Worship grant has been completed. A second grant application to the Heritage Lottery Fund is to be submitted in 2016.

SITE NAME:	Church of St Edmund, The Street, Costessey
DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Very bad
PRIORITY CATEGORY:	F (F)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1305980

The church sits on high ground at the northern end of the village of Old Costessey. Mainly C14 (Decorated), with a C15 porch. The upper section of the tower is in brick and much later, as is the bell turret. Links with the Jerninghams of Costessey Park, a prominent Catholic recusant family. The church suffers from dampness caused by deteriorating slate roofing over the nave and chancel. Both roofs have rusting fixings, and the Delabole slates are crumbling. A Heritage Lottery Fund Grants for Places of Worship grant was awarded in 2015 and the project development phase is underway in 2016.

OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1152891

The west tower and nave of this church date from the C11. Characteristic Norman windows of that period survive, but the nave roof was replaced in the C15 with a double hammerbeam roof, all the more remarkable for its small scale and good state of survival. Repairs are needed to the masonry and roofs of the tower, north porch and chancel. A Heritage Lottery Fund Grants for Places of Worship grant was offered 2015 and project development work commenced in 2016.

DESIGNATION:	Listed Place of Worship grade II*
CONDITION:	Fair
PRIORITY CATEGORY:	F (F)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1050731

Church of C11 origins, with fabric surviving of that period (long and short quoins, and reused Roman tiles). The extent of C19 rebuilding or restoration is less extensive than once believed, hence its recent upgrading to II*. Areas of flintwork in poor condition, especially on the tower. A Historic England and Heritage Lottery Fund Repair Grants for Places of Worship grant was offered in 2010 and the repairs completed in 2015. A Listed Places of Worship Roof Repairs grant was offered in March 2015 and the repairs commenced in 2016.

DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Poor
PRIORITY CATEGORY:	C (C)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1169126

Parish church. C11 with C13 and C15 re-modelling. Round west tower, probably late C11, divided into stages by three stone bands. North west bay of chancel has C15 two-light window flanked by blocked circular openings. North aisle has two-light C13 'Y' tracery windows and, at north west corner, north doorway with billet hood mould and shaft, scallop and roll-moulded arches. Widespread damage from damp caused by inadequate disposal of rainwater is leading to deterioration of internal fabric and structural problems in external walls.

SITE NAME:	Church of St Botolph, Chapel Lane, Morley
DESIGNATION:	Listed Place of Worship grade II*
CONDITION:	Poor
PRIORITY CATEGORY:	C (C)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1373064

Parish church dating to the C15, restored and re-roofed in the 1960s. Constructed from flint with ashlar and brick dressings. Pantile roof. Although re-roofed in the 1960s, there are a number of slipped tiles on the south slope and heavy moss to the north, alongside blocked gutters. The rainwater goods are in a poor condition throughout. Pigeons in the tower may also be causing damage.

PETERBOROUGH, CITY OF (UA)

© Dr Jackie Hill, Cathedral Archaeologist

SITE NAME:	Peterborough Cathedral precinct wall, Peterborough
DESIGNATION:	Scheduled Monument and Listed Buildings - 10 grade I, 5 LBs, part in RPG grade II, CA
CONDITION:	Poor
OCCUPANCY:	N/A
PRIORITY CATEGORY:	A (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1003264 and 1126932; 1331514; 1126930; 1126937; 1161429; 1161668; 1331517; 1331494; 1126939; 1161737

Various sections of the Cathedral precinct wall, of medieval (and some places, perhaps, Saxon) origin with later stone and brick refacing, are in very poor condition and need significant amounts of repointing and recapping. Two sections of fallen wall and one propped section have been rebuilt. The walls are vulnerable to water penetration which has led to stone decay. Some repairs completed and discussions for further phase of repairs have been progressed during 2015-16.

SOUTHEND-ON-SEA (UA)

© Historic England

SITE NAME:	Manor House, Suttons Road, South Shoebury
DESIGNATION:	Listed Building grade II*
CONDITION:	Poor
OCCUPANCY:	Vacant/not in use
PRIORITY CATEGORY:	A (C)
OWNER TYPE:	Government or agency
LIST ENTRY NUMBER:	1306855

House, 1681. Currently vacant, last used as residential quarters. Re-use of the building is complicated by its location within a military site. A serious dry rot problem was treated 1998-2003, but has caused considerable damage to the interior. Building has been vacant for many years. Rigid application of 3-year break clause in all long leases granted by Ministry of Defence has seriously worsened potential for reuse by charitable trusts. On-going water ingress due to defective rainwater goods and failure of lead flashing at rear of building where main house abuts flat-roofed extension.

SUFFOLK

BABERGH

© Historic England

SITE NAME:	Barn north east of Bentley Hall, Bentley Hall Road, Bentley
DESIGNATION:	Listed Building grade II*
CONDITION:	Very bad
OCCUPANCY:	Vacant/not in use
PRIORITY CATEGORY:	D (A)
OWNER TYPE:	Private
LIST ENTRY NUMBER:	1351965

Barn built C15, timber-framed and brick nogging. It is redundant and is only suitable for a very low-key use. It is structurally unstable and water is penetrating the walls in places, accelerating decay of its structure. Historic England and the Local Authority are involved in ongoing discussions with the owner to secure the conservation of the barn. Urgent works notice served and some repairs implemented. Work underway to prepare a Repairs Notice, anticipated for Spring 2017.

SITE NAME:	Church of St Mary, The Street, Arwarton
DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Very bad
PRIORITY CATEGORY:	F (F)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1286145

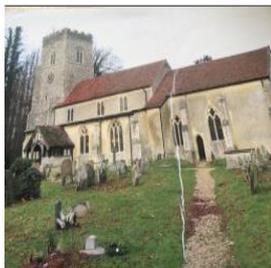

Parish church located in the small hamlet of Erwarton (or "Arwarton"). Historic fabric of church dateable from C14. Some interesting repairs of 1838 in the Georgian tradition, which add to the architectural character. Serious erosion of the tower facework and quoins, posing a risk of partial collapse. A Heritage Lottery Fund Grants for Places of Worship grant was offered in 2014. Repairs are due to be completed late 2016.

Contact: Malcolm Starr 01223 582723

SITE NAME:	Church of St Mary, Fish Pond Hill, Harkstead
DESIGNATION:	Listed Place of Worship grade II*
CONDITION:	Poor
PRIORITY CATEGORY:	B (New entry)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1286085

Parish church twelfth century origins: fourteenth century south arcade and west tower, fifteenth century chancel and south porch. Victorian rebuilding of roofs chancel and north chapel. Random flint, rubble and septaria, red brick crenellations to tower, stone dressings, stone and flint flushwork to buttresses, carved stone panels to plinth of tower. Red plain tiled roofs. Decay of masonry particularly tower septaria. Roofs failing. HLF grant applied for mid 2016.

SITE NAME:	Barn 200 metres west of Hall's Farmhouse, Halls Lane, Norton
DESIGNATION:	Listed Building grade II*
CONDITION:	Very bad
OCCUPANCY:	N/A
PRIORITY CATEGORY:	B (C)
OWNER TYPE:	Private
LIST ENTRY NUMBER:	1352406

Timber-framed and weatherboarded barn, mid C16. High quality timber frame with some rare features. Soleplates rotted and whole barn leaning sideways. Although propped, permanent repairs now required to secure the structure. Roof was wind and weathertight on date of last visit. Discussions continue regarding repairs and potential alternative uses. Historic England Repair Grant for Heritage at Risk accepted and project development phase, including a structural survey, commenced summer 2016.

Contact: Claire Fidler 01223 582735

SITE NAME:	Church of St Lawrence, Church Lane, Brundish
DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Very bad
PRIORITY CATEGORY:	F (F)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1352203

Parish church of Norman origins with C12 tower. C14 and C15 alterations. Very fine internal features include a window niche with surviving medieval polychrome decoration. A C15 pulpit and a collection of pews typifying their development from medieval to C18. Very poor rain and ground water disposal arrangements have resulted in extensive internal damp and initial stages of decay in the pews. This is also affecting the electrical wiring. A Heritage Lottery Fund Grants for Places of Worship grant was awarded in 2015 and repair works are on-going due for completion late 2016.

Contact: Malcolm Starr 01223 582723

SITE NAME:	Church of St Mary, The Street, Horham
DESIGNATION:	Listed Place of Worship grade II*
CONDITION:	Poor
PRIORITY CATEGORY:	C (C)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1032540

Medieval parish church. Core of the nave probably dates from C12. The nave contains C12 doorways. The chancel was largely rebuilt 1879-8. Beneath all the belfry lights are square flushwork. The nave seating includes C15 benches with poppyhead ends enriched with buttressing and fleurons. Principal issue of damp, particularly on external walls of the nave.

Contact: Janine Dykes 01223 582724

SITE NAME:	Church of All Saints, The Street, Laxfield
DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Poor
PRIORITY CATEGORY:	F (F)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1180967

Church of C14 origins, but earlier fabric may survive. Good collection of pews from the medieval period onwards, and traces of medieval polychrome decoration surviving on the font. The very fine flushwork tower has suffered from erosion and weather ingress at high level. South and west faces have been repaired, but work is now needed urgently to the east and north before fabric is lost. Leakage at the abutment of the C19 chancel roof to the nave. A Heritage Lottery Fund Grants for Places of Worship grant was awarded in 2015 and the repairs are underway in 2016.

Extensive mid-C19 Italianate garden by Charles Barry set in C17 park, for which Humphry Repton prepared a Red Book in 1789 and William Woods in 1808. Many proposals have been implemented in the expanded park. The site is in divided ownership following sale in 2009 and boundary fence erected. Management of Old Hall landscape is improving but the built garden features and planting are significantly decayed. Improved management strategies for the park as a whole need to be developed to safeguard its future.

Former Ministry of Defence strategic defence site, built 1953-1955. Purchased and in use as an industrial estate since 1965. Elements at risk due to short term anticipated lifespan. Successive grant aided phases of work undertaken between 2011-2015 with privately funded works by the owner, have greatly improved the condition of the site. Owner has received a fifth phase of grant which includes urgent repairs to gables in front of buildings 60 & 61. This work will be complete by the end of 2016, following which we anticipate its removal from the Heritage at Risk register.

Remains of brick banqueting house and associated revetting on northern corner of moat island. North-east wall and part of the underlying revetment have recently collapsed into the moat, resulting in loss of historic fabric and instability to other parts of the structure. Issues include erosion around the base, unstable ground formations behind the collapsed brickwork, a large vertical fracture in the corner of the north-west wall and lintel failures and loss of brick work around the doorway and window. Part of grade II listed garden wall also collapsed.

LIST ENTRY NUMBER:	1031410

Early C19 Coade stone folly. Very poor condition: roof missing, ingress of water is rusting iron core. The proposal to dismantle it and re-erect in a new location had been granted listed building consent, but was not implemented. A programme of photographic recording and building analysis was undertaken by Historic England in 2012. No further progress has been made since this date.

SITE NAME:	Church of St Mary, Cavendish
DESIGNATION:	Listed Place of Worship grade I, CA
CONDITION:	Poor
PRIORITY CATEGORY:	C (C)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1031774

Church dating from the C14, prominently situated in the Cavendish Conservation Area at the east end of the green. Unusual features include the vaulted parvise and external arched timber bell cage and flagpole combined which sits on the tower parapet. There is some deterioration of masonry on the tower. The flagpole has begun to lean, possibly because the plated joint at low level is becoming ineffective. An application for a Heritage Lottery Fund Grants for Places of Worship grant is being considered.

SITE NAME:	Martello Tower "Z", south east of Buckanay Farm, Alderton
DESIGNATION:	Scheduled Monument and Listed Building grade II
CONDITION:	Poor
OCCUPANCY:	N/A
PRIORITY CATEGORY:	A (B)
OWNER TYPE:	Private
LIST ENTRY NUMBER:	1006014 and 1030773

Martello Tower Z forms part of a chain of Martello towers along the south and east coast of England dating from the early C19. The tower has been unused since the Second World War. Whilst generally robust and structurally sound a recent condition survey undertaken as part of a Heritage Lottery Fund Landscape Heritage Initiative has indicated the need for repairs to prevent water ingress. Further discussions with the owner are needed to consider any urgent conservation works to the tower.

CONDITION:	Poor
OCCUPANCY:	N/A
PRIORITY CATEGORY:	F (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1283823

The medieval ruins of a much larger church are at risk due to structural failure and unconsolidated walling. Some active areas of loose stonework are apparent where flint cobbles and brick are eroding out of the wall surfaces. A programme of Historic England and WREN grant funded repairs to conserve the ruins has been agreed and works are in progress. The Church of St Andrews, which is regularly used for worship, is not at risk.

CONDITION:	Very bad
PRIORITY CATEGORY:	F (F)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1030735

Parish church, unchanged since the early C19, with box pews, a double-decker pulpit on the south side of the nave, and no electricity: services being held by candlelight. The round tower is at least of Norman origin but is allegedly Saxon, serving as a watchtower for Viking raids. The tower roof and masonry are in very poor condition. A Heritage Lottery Fund Grants for Places of Worship grant was offered in 2013 and the repairs commenced in 2016.

LIST ENTRY NUMBER:	1111543

The State Cinema is one of the best preserved of the 'super cinemas' of the late 1930s. It was constructed in 1938 by F G M Chancellor for Frederick's Electric Theatres. The building has suffered from heritage crime and the roof, rainwater goods and interior are in poor condition. The reuse of the vast cinema poses complex problems, as confirmed by a feasibility study some years ago. The building is in new ownership and preliminary proposals are under discussion for conversion to a public house. Currently, asbestos and bird droppings are being removed throughout the building.
