- Local Planning Authority

# HERITAGE AT RISK

We are all justly proud of England's historic buildings, monuments, parks, gardens and designed landscapes, battlefields and shipwrecks. But too many of them are suffering from neglect, decay and pressure from development. Heritage at Risk is a national project to identify these endangered places and then help secure their future.

In 2008 English Heritage published its first register of Heritage at Risk – a region-by-region list of all the Grade I and II\* listed buildings (and Grade II listed buildings in London), structural scheduled monuments, registered battlefields and protected wreck sites in England known to be 'at risk'. A year later, this second updated regional edition of the register has been enlarged to include details of all scheduled monuments (archaeological sites) and registered parks and gardens, as well as conservation areas designated by local authorities that are also reported to be at certain or potential risk.

The South East region is a rich and varied landscape of historic towns and cities, rural villages, coastal resorts and outstanding countryside. This quality of the historic environment is fundamental to its appeal as a place to live and work. Understanding the condition of this remarkable heritage resource is therefore vital if we are to sustain it in the long-term for future generations.

**£72.3m** ESTIMATED OUTSTANDING CONSERVATION DEFICIT FOR BUILDINGS AT RISK ALONE

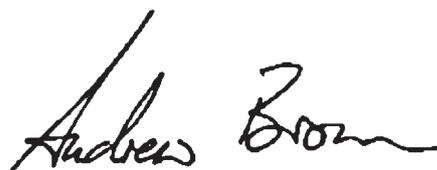

In total, the expanded South East register of Heritage at Risk in 2009 contains some 582 heritage assets, featuring not only Grade I and II\* listed buildings, protected historic wreck sites and registered battlefields, but for the first time detail on registered parks and gardens, scheduled monuments and conservation areas. Identifying those assets that are at risk and monitoring their condition will help us to plan and prioritise our expertise, resources and grant investment effectively in order to secure sustainable solutions for their futures.

In its first ten years, the Buildings at Risk register proved a useful focus for this and helped direct our investment priorities. The register was effective in highlighting need. Working with owners and partners and providing substantial grant-aid, we have now secured the future of a total of 109 buildings from the original register of 1999. In 2008/9 alone, we succeeded in removing 10 entries and offered grants totalling £417k towards ten different Heritage at Risk

projects. We will continue to use the register as the principal guide for our investment strategy in the future, focusing our funds and expertise towards those assets and owners with the greatest need for our help.

But this will be ever-more challenging in the future with the additional number of assets now on the register; the varying nature and scale of risk to each asset type, and the current economic climate – for entries on the Buildings at Risk register alone, there is an estimated conservation deficit of £72.3m. Each asset type will require a different approach. Many parks and gardens, for example, are in multiple ownership and unlike buildings they often lack an obvious commercial benefit to warrant investment. Similarly, the local authorities that designate conservation areas and have responsibility for their management are under increasing budgetary pressures; in particular, conservation staff are being reduced in many councils. This will inevitably have an impact on the quality and character of conservation areas in the future.

Resolving these cases will not be easy but we are committed to working with partners to deliver lasting solutions that will contribute to making quality places for the benefit of the entire region.

Andrew Brown, Planning and Development  
Regional Director, South East

# Heritage at Risk 2009

The 2009 register for England includes 5,094 nationally designated sites that are at risk, along with 727 locally designated conservation areas at risk. These sites are important and irreplaceable elements of our historic environment and help contribute to local and national character. By assessing their condition and identifying which are most at risk, we can define the scale of the problem and plan and prioritise the resources needed to bring them back into good repair – and, where appropriate, into practical use – for the benefit of present and future generations.

This year more than 400 heritage assets have been added to the South East Heritage at Risk register. These include one additional protected wreck site, 140 conservation areas, 270 scheduled monuments, and 24 registered parks and gardens. Alongside this the region still has 1 registered battlefield at risk, 6 other protected wreck sites at risk and some 167 entries on the Buildings at Risk register. With nearly 600 individual elements of the historic environment of the South East now officially 'at risk' the statistics paint a disturbing picture.

## THE NATIONAL PICTURE

The table on the opposite page sets out the number and percentage of nationally designated assets that have been identified as 'at risk'. The significant variations in the proportions at risk reflect important differences not only in the physical character of the historic assets, but also differences in the way in which they are used. Buildings generally have an economic value to their owners, particularly when capable of adaptive use. The percentage of Grade I and II\* listed buildings at risk (3.1%) is thus lower than for the other asset types.

By contrast, assets that have far less economic benefit have higher percentages at risk. Archaeological monuments have little direct economic benefit and, as a result, often suffer from neglect, and a far higher percentage, 17.9%, is at risk. The main threats to historic landscapes, parks, gardens and battlefields come from either neglect or from unsympathetic development – 6% of parks and gardens and 16.3% of battlefields are currently at risk. The main threats facing wreck sites are from the forces of the sea and natural decay, and wreck sites have the highest proportion at risk (19.6%) of all asset types. The relatively low proportion of listed buildings at risk is also the result of work that has been put in by individuals and agencies over many years to identify them and then secure their future. English Heritage began assessing the condition of listed buildings in the 1980s, publishing the first annual register of Buildings at Risk in London in 1991, and the first national register of Grade I and II\* listed buildings and structural scheduled monuments at risk in 1998.

The registers have enabled English Heritage and its partners in local authorities, building preservation trusts and funding bodies, as well as owners, to understand the extent of the problem and to prioritise action and resources. As a result, the proportion of England's highest-graded (I and II\*) listed buildings at risk has fallen steadily from 3.8% in the baseline year of 1999 to 3.1% this year. Of the Grade I and II\* listed building and structural scheduled monument entries on the baseline register, 48% have now been removed.

While the condition of the nation's Grade I and II\* listed buildings has improved, this year's Heritage at Risk registers show that England's other nationally designated heritage assets face much greater levels of risk, and highlight the scale of the challenge and the resources needed, both at a national and local level.

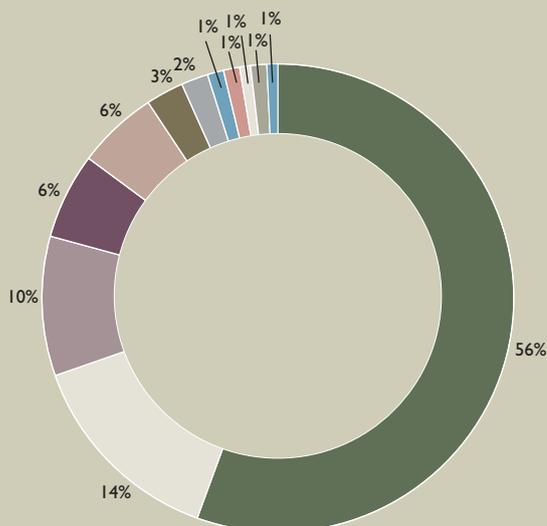

Working with property owners and our partners, we aim to achieve similar progress in reducing risk to other heritage assets. This will be challenging in the current economic climate, given the high proportion of heritage sites that do not, even in more prosperous times, generate an income. Their importance as part of our heritage is nevertheless immeasurable, and their urgent needs must not be ignored.

Inclusion of sites on this register does not imply criticism of their owners, many of whom are actively trying to secure their future. While we have tried to ensure that the information included is accurate, we will correct any errors or omissions brought to our attention. We welcome further information and corrections.

Further information on heritage at risk is given on page 20, and on our website: [www.english-heritage.org.uk/risk](http://www.english-heritage.org.uk/risk). An interactive database providing detailed information on all heritage sites at risk nationally can also be found on our website.

## SOURCE OF RISK TO SCHEDULED MONUMENTS IN THE SOUTH EAST

SOURCE OF RISK	NUMBER	PERCENTAGE
Arable ploughing / clipping	150	56
Scrub / tree growth	38	14
Animal burrowing	26	10
Deterioration – in need of management	16	6
Plant growth	15	6
Collapse / subsidence	7	3
Other*	5	2
Coastal erosion	3	1
Development requiring planning permission	3	1
Forestry	2	1
Stock erosion	3	1
Vandalism	2	1

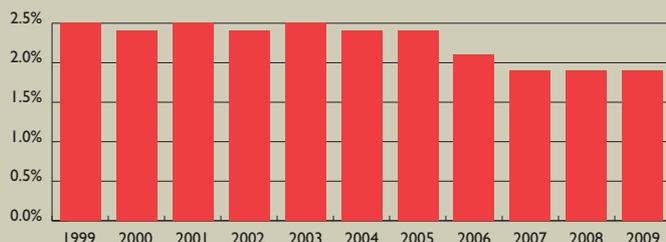

\* 'Other' category includes Flooding (0.4%), Natural erosion (0.4%), Rain entry (0.4%), Vehicle damage / erosion (0.4%) and Visitor erosion (0.4%)

## NUMBER AND PERCENTAGE OF HERITAGE ASSETS AT RISK NATIONALLY AND IN THE SOUTH EAST

ASSET TYPE	ENGLAND 2009			SOUTH EAST 2009		
	NO. OF ASSETS	NO. OF ASSETS AT RISK	% AT RISK	NO. OF ASSETS	NO. OF ASSETS AT RISK	% AT RISK
GRADE I AND II* LISTED BUILDING ENTRIES	30,776	969	3.1%	5,561	104	1.9%
GRADE II LISTED BUILDING ENTRIES IN LONDON	16,561	401	2.4%	N/A	N/A	N/A
SCHEDULED MONUMENTS	19,719	3,535	17.9%	2,627	270	10.3%
REGISTERED PARKS AND GARDENS	1,600	96	6.0%	366	24	6.6%
REGISTERED BATTLEFIELDS	43	7	16.3%	366	24	6.6%
PROTECTED WRECK SITES	46	9	19.6%	366	24	6.6%

The number of assets at risk in the South East is 406 (England, 5,017) and the total number of entries on the South East register is 442 (England, 5,094). The difference is due to a small number of scheduled monuments with structural elements which are not also listed Grade I or II\* and which are assessed as and included on the register as buildings at risk.

## PERCENTAGE OF GRADE I AND II\* LISTED BUILDINGS AT RISK IN THE SOUTH EAST

## PERCENTAGE OF REGISTERED PARKS AND GARDENS AT RISK BY GRADE

## WESTENHANGER BARN, KENT

Westenhanger Barn, dating from the 16th century, is an extravagantly designed building adjacent to a 14th-century castle – Kent's forgotten great country house of the Tudor period. This unusual and massive barn was part of the service buildings but has a magnificent hammer-beam roof.

The barn has featured on the Buildings at Risk register since 1999 and, following consolidation into single ownership with the castle in 2003, is now part of a major programme of conservation works throughout the site. Work to repair the barn itself finally began in 2007 following technical advice and a grant of £500,000 from English Heritage.

Progress on conserving the barn progresses well and is due to complete in autumn 2009. After careful conservation of the roof timbers work on the daunting task of re-laying the thousands of clay peg tiles on its roof slopes is under way.

# BUILDINGS AT RISK

Of England's 30,776 outstandingly important Grade I and II\* listed buildings, 969 (3.1%) are at risk through neglect and decay (or vulnerable to becoming so). This year, the future of 69 buildings on the national register has been secured, while 64 newly identified buildings have been added. Of the entries on the original 1999 baseline register, 48% (685) have now been removed, but the rate of removal is slowing as we and our partners strive to resolve the more intractable cases.

In the past year, English Heritage offered £9.5 million to 113 buildings at risk: £8.5 million to 102 Grade I and II\* listed buildings, £248,000 to Grade II buildings in London and £721,000 to places of worship (under the scheme we fund jointly with Heritage Lottery Fund). Since 1998/99, we have offered £54.4 million in grants to Grade I and II\* listed buildings at risk.

There are 167 Grade I and II\* listed buildings or structural scheduled monuments at risk entries on the Heritage at Risk register 2009, just two fewer than in 2008. This figure represents 13.6% of the total number of entries on the national register; the highest percentage in any region. Proportionally, the South East also has the highest number of structural scheduled monuments on its Buildings at Risk register when compared with the other regions, which reflects the large number of important former defence sites we have in the region.

This year a total of 10 entries were removed from the register, but this was offset by 9 new entries being added (plus one entry being reassigned to the Scheduled Monuments at Risk category). Of the 10 removed, 8 were on the original Buildings at Risk register of 1999, meaning that in the last eleven years we have secured the future of 109 of the original 233 entries on the baseline register – more than any of the other regions. With 47% of entries now removed,

the region is approaching the half-way mark. However, it also means that it is the most intractable and challenging cases that remain on the register, where sustainable solutions are hardest to find.

We are, however, still making significant progress with some of those intractable cases. The Tudor Shurland Hall in Kent, for example, was on the 1999 register and with an English Heritage grant of £300K the Spitalfields Trust has made remarkable progress with the repair of the gatehouse so that it can be re-occupied as a house. Our experience in the last eleven years has taught us that whilst our grant-aid is often a crucial tool in brokering solutions, money is not always the vital ingredient to securing success for these cases. The key steps are often taken through developing successful partnerships with owners, local authorities and other partners. This will become ever more important as competition for our grants is spread across a much larger Heritage at Risk register.

## OLD SHOREHAM TOLL BRIDGE, WEST SUSSEX

This historic bridge links Shoreham-by-Sea to Lancing and Worthing by spanning the River Adur tidal estuary. In 1968 it became a public bridleway having previously formed part of the heavily used A27 road.

The ravages of time and weather gradually took their own toll on the bridge. Thanks to the Old Shoreham Community Trust, funds, including a grant from the Heritage Lottery Fund, were raised to repair the bridge. Work was completed during 2008, allowing the bridge to be removed from the Heritage at Risk register this year.

# MONUMENTS AT RISK

Since the launch of Monuments at Risk, almost 900 scheduled monuments have been removed from the 'at risk' category, representing a reduction of around 20% nationally. Since 2008 a rigorous checking and updating exercise has been undertaken by the regional teams. While this work identified some inconsistencies (not least the inclusion of scheduled monuments containing structural elements more suitable for the Buildings at Risk register), this reduction is irrespective of these changes. By any measure the improvement represents a remarkable achievement and demonstrates the validity of the Heritage at Risk initiative.

These impressive results should not make us complacent; highlighting the risk in order to begin a dialogue with owners of monuments is only the first stage of what can be a long process. While small changes in management can often do much to improve condition, securing the future of a significant proportion of monuments will require further study, partnership working and resources. This cannot be achieved overnight.

The Heritage at Risk register 2009 contains for the first time a full listing of the 270 scheduled monuments at risk in the region, representing 10.3% of the region's 2,627 scheduled monuments. They include prehistoric burial mounds and hillforts, Roman towns, villas and forts, medieval settlements, castles and abbeys and post-medieval fortifications and industrial structures. The vast majority of at risk scheduled monuments are in private ownership, with just 6% owned by central government or its agencies and 4% by local authorities. The most common form (54%) of at risk scheduled monument is an ancient earthwork.

These monuments are all vulnerable to a wide range of damaging human activities and natural processes, arable farming being the predominant threat with 56%

at risk from this. Scrub and tree-growth are a threat to a further 14%, and extensive animal burrowing to a further 10%. All but 8 of the scheduled monuments at risk are considered to be in a state of active decline.

With many other important sites classified as at medium risk through our survey work, it is clear that more than half of all monuments need urgent action to prevent deterioration, loss or damage. English Heritage will be dedicating some of its grant aid in 2009/10 to developing solutions for scheduled monuments at risk. This itself will pose new challenges, not least because we must recognise the increasing pressure on our agricultural land to produce not only food but also energy crops as we square up to the challenges of climate change.

## SEVEN BARROWS, LAMBOURN, WEST BERKSHIRE

This well-preserved Bronze Age cemetery is both a scheduled monument and a Site of Special Scientific Interest was recently reduced from high to low risk. The site is managed as a nature reserve by the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trusts.

Rabbits had caused substantial disturbance of archaeological remains and the chalk grassland was in an unfavourable condition so English Heritage, English Nature and West Berkshire Council worked together to protect the archaeological remains and promote biodiversity through the installation of stock and rabbit fences and the introduction of Dexter cattle for conservation grazing.

#### LEWES PRIORY, EAST SUSSEX

Established in the late 11th century, Lewes Priory was the first Cluniac foundation in Britain. The ruins are exceptionally significant but at risk because of the serious decay of the stonework. A solution, however, has now been agreed. The Lewes Priory Trust has received grants from English Heritage and the Heritage Lottery Fund for conservation and the provision of free access and interpretation and it is anticipated that Lewes Priory Park will eventually create a long-lasting and sustainable heritage benefit for the town.

## NEWBOLD COLLEGE, BRACKNELL, BERKSHIRE

Moor Close estate, now the home of Newbold College, includes an Edwardian mansion that was the first house and garden to be designed by Oliver Hill in an early 20th-century Arts and Crafts style. The intricate gardens comprise fragile fabric with interesting architectural features and decoration. A condition survey has been completed with a grant from English Heritage. Some restoration work has been undertaken but other parts of the garden have continued to deteriorate; restoration is expensive because of the architectural nature of the garden. Unfortunately a recent pre-application to the Heritage Lottery Fund was unsuccessful as the College is unable to fulfil the public access criteria.

# PARKS AND GARDENS AT RISK

There are only 1,600 parks and gardens registered for their historic interest, so each is very special. Diverse in style and size, they reflect the fashions and aspirations of past generations. These art forms are one of the foundations to our national passion for gardens and gardening. But all is not rosy and some are threatened by development pressures or are neglected and decaying.

For the first time, English Heritage is publishing a list of those that are vulnerable as part of its Heritage at Risk register. Some 6% of sites are considered to be at risk and most of these are deteriorating. The pattern of parks and gardens at risk is similar across the country. With the aid of the Heritage at Risk register, English Heritage is able to take stock of the pressures and challenges to the historic interest of these sites, and direct advice and grants towards those whose historic significance is most at risk.

For the first time, the Heritage at Risk register 2009 contains full listings of the 24 registered parks and gardens considered to be at risk in the South East, 6.6% of the total number of registered landscapes in the region. This is a significantly higher number than any other region, and represents one quarter of the 96 sites considered at risk nationally. Of the South East sites at risk:

- 16 of the 24 are registered Grade II, 7 are Grade II\*, one is Grade I (Brookwood Cemetery)
- 19 of the 24 sites are considered to be actively deteriorating

- Only 7 have a full or partial conservation management plan
- The principal risks to these landscapes are from development and/or neglect.

English Heritage will be dedicating some of its grant aid in 2009/10 to working with owners and partners to develop solutions for registered parks and gardens at risk. This may be in the form of direct grant-aid for improvement works, or to help site owners to invest in a conservation management plan as the first step to managing the risks.

## CLAREMONT LANDSCAPE GARDEN, SURREY

Claremont is a beautiful Grade I garden, the creation and development of which involved many of the great names in garden history, including Sir John Vanbrugh, Charles Bridgeman, William Kent and 'Capability' Brown. In 1726 it was described as 'the noblest of any in Europe'. A recent conservation management plan now proposes the re-establishment of a physical link between the pleasure grounds, now in the care of the National Trust, and other parts of the park that are in separate ownership.

# BATTLEFIELDS AT RISK

The Register of Historic Battlefields contains 43 sites that have been selected as the most important, identifiable military engagements on English soil. These were often the turning points of English history – places where people risked their lives fighting for a cause. Not all regions have registered battlefields which are classified as ‘at risk’ in the national 2009 register, but as the case study below illustrates, such sites are vulnerable to loss because they can cover large areas of ground and their extents are rarely obvious. They often appear little different to other parts of the country, with their interest lying in their landscape, their archaeology and as a place of commemoration. Furthermore, while inclusion on the Register affords special consideration for the battlefield in the planning process, it does not protect against threats that do not require planning permission.

## TOWTON BATTLEFIELD, NORTH YORKSHIRE

High, bleak, arable land near Tadcaster was the scene of a ten-hour battle on 29 March 1461 during the Wars of the Roses. Fought in a snow storm, the battle is said to have claimed 28,000 lives. Artefacts and arrowheads from the battle have been consistently targeted by metal detectorists, some unauthorised and working independently of any agreed archaeological survey. At least one episode of deep ploughing may have disturbed a possible mass grave. Today, the Towton Battlefield Society has a strong and active membership that seeks to protect the battlefield and promote research and education. © Glenn Foard

## REGISTERED BATTLEFIELDS AT RISK IN ENGLAND

- 1 Newburn Ford (1640)
- 2 Boroughbridge (1322)
- 3 Stamford Bridge (1066)
- 4 Towton (1461)
- 5 Adwalton Moor (1643)
- 6 Newbury I (1643)
- 7 Langport (1645)

# SHIPWRECKS AT RISK

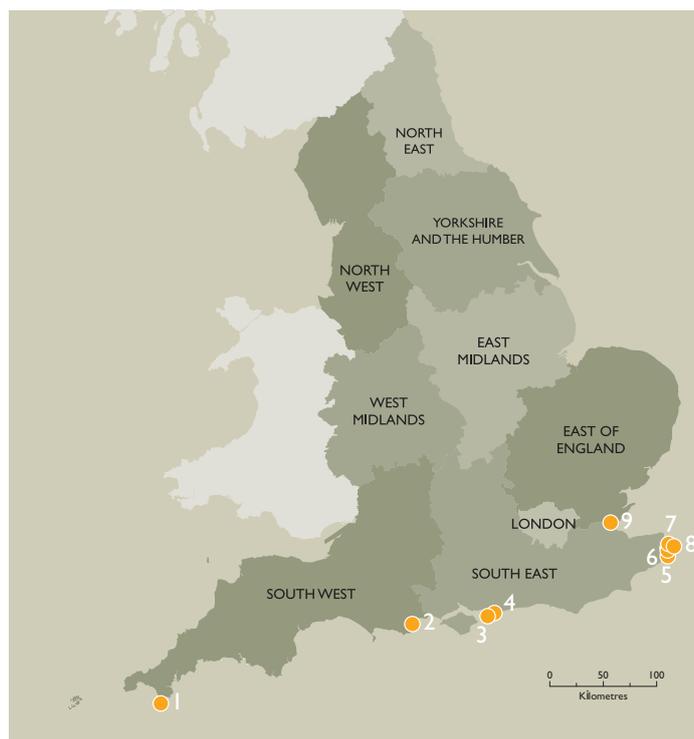

Not every region's 2009 Heritage at Risk register features a shipwreck at risk, but in the English territorial sea as a whole the density of shipwreck remains is among the highest in the world. Our 46 protected sites represent a tiny proportion – just 1 in 706 – of the 32,476 pre-1945 casualties known to lie in the territorial sea. Wrecks are vulnerable to both environmental and human impacts. Because they are in remote locations, their management can be challenging – and changes to their condition are difficult to anticipate.

In 2009 English Heritage audited all designated wreck sites to better understand their condition and vulnerability. As a result, nine sites were deemed to be most at risk and are included on the national Heritage at Risk register – an example is *Swash Channel* off the Dorset coast (below).

## SWASH CHANNEL WRECK, DORSET

In October 2004, archaeological assessment work in advance of channel deepening in Poole Harbour led to the discovery of this previously unrecorded wreck. A recovered fragment of Rhenish stoneware and the general form of the surviving structure of the vessel both suggest an early 17th-century ship, probably an armed vessel. Because of its national significance, the wreck was designated in December 2004. However, it is unstable and subject to dramatic shifts in exposure. Monitoring by Bournemouth University showed that 300mm of sediment had been lost across the site in just two years, resulting in the exposure of further sections of the ship to the destructive force of the sea. The vessel is now deemed to be at risk and English Heritage is working with Bournemouth University to implement a management plan to mitigate the loss. © Bournemouth University

## PROTECTED WRECK SITES AT RISK IN ENGLAND

- 1 The Royal Anne (Lizard Point, Cornwall)
- 2 Swash Channel wreck site (Poole Bay, Dorset)
- 3 HM Submarine A1 (Eastern Solent)
- 4 The Hazardous (Bracklesham Bay)
- 5 The Northumberland (Goodwin Sands, Kent)
- 6 The Restoration (Goodwin Sands, Kent)
- 7 The Stirling Castle (Goodwin Sands, Kent)
- 8 The Rooswijk (Goodwin Sands, Kent)
- 9 The London (Thames Estuary)

## VALLEY GARDENS CONSERVATION AREA, BRIGHTON

The Valley Gardens conservation area includes some of the earliest buildings from Brighton's fashionable Regency period, including some of the town's most important listed buildings and open spaces. The area features on the register because of the effects of heavy traffic, redevelopment proposals and the significant number of vacant and poorly maintained properties. Brighton and Hove City Council is prioritising the area for proactive enforcement action to secure repairs to historic buildings and hopes to make a bid for a grant-aided partnership scheme in the future.

# CONSERVATION AREAS AT RISK

For 40 years conservation areas have been helping to preserve the special character of the nation's best-loved places – not only at the heart of our historic cities and market towns but in the suburban neighbourhoods, former industrial quarters and rural villages that together give this country its irreplaceable distinctiveness. They can encompass many elements of the historic environment: buildings; spaces; designed landscapes and archaeological remains. In this sense, they are unique designations and their value lies in the experience of the area as a whole, as opposed to being simply a collection of separate buildings.

Conservation areas were introduced by the 1967 Civic Amenities Act as 'areas of special architectural or historic interest the character or appearance of which it is desirable to preserve or enhance' (s.79). Since then, more than 9,300 have been designated by local authorities across England. This means that we all visit, work in or live in conservation areas on a regular basis: they are part of our everyday life and represent what we value most about our surroundings.

Their designation is about recognising the significance of an area – what gives it its special character – and then about managing its future. Designation is not intended to prevent change or adaptation but simply to ensure that any proposals for change are properly considered. In many conservation areas the balance is working well, but we know that in some others ill-considered change is putting their special architectural or historic interest at serious risk.

Across England as a whole, about half of all conservation areas are rural, mainly covering the centres of villages and small towns, while about a

quarter are urban and the remainder primarily suburban in character.

The South East region has more than 2,000 conservation areas, ranging from the historic core of Oxford to the villages of the South Downs; from the seaside resorts like Hastings to the former defence estates around Gosport.

By their nature, conservation areas will be among the best environments in the country and they project a positive image to visitors and inward investors. The majority of England's city, town and village centres are designated as conservation areas. Good conservation-area management can lead to better shopping areas, parks and gardens and residential neighbourhoods.

Our conservation areas protect many of the region's quality places to live and work. They mark out areas cherished for their special local character and bring economic and social benefits to communities, as well as safeguarding and enhancing their environmental qualities. They can be a powerful focus for local renewal, as has happened at Ryde on the Isle of Wight.

## RYDE CONSERVATION AREA

Central Ryde was originally designated as a conservation area in 1969 and is considered to be the Isle of Wight's finest Regency period town. The town, however, has declined during the last 30 years as a result of neglect, economic stagnation and poorly completed alterations. The Isle of Wight Council is now taking action to address these issues with a Townscape Heritage Initiative scheme established to secure repair and reuse of historic buildings and to improve the public realm in the area. So far the scheme has successfully improved 36,000sq feet of public realm, including winning the 2008 Isle of Wight Society Conservation Award for the St Thomas' Churchyard Enhancement project.

# The 2009 Conservation Areas Survey

As the starting point to our Conservation Areas at Risk campaign we asked every local authority in England to complete a questionnaire about the condition of each of the conservation areas in its district. This is the first survey of its kind ever carried out. More than 70% of local authorities took part and the results are providing us with some very important information.

The good news is that most of our conservation areas are in a relatively stable state. From the responses received, we now know that the condition of more than 70% of them has not changed significantly over the last three years. Rather less encouraging, however, is the fact that only 15% of conservation areas have actually seen a positive improvement in their condition since 2006.

In the South East region our survey has identified that 140 out of 1,224 sampled conservation areas are at risk – 11% of the total, and just under the national average of 15%. Among the most commonly identified problems were development pressures and traffic issues. These can combine with other smaller scale issues, such as a prevalence of street clutter, to substantially erode the quality and character of the areas.

## HOW DO WE REDUCE THE RISKS TO CONSERVATION AREAS?

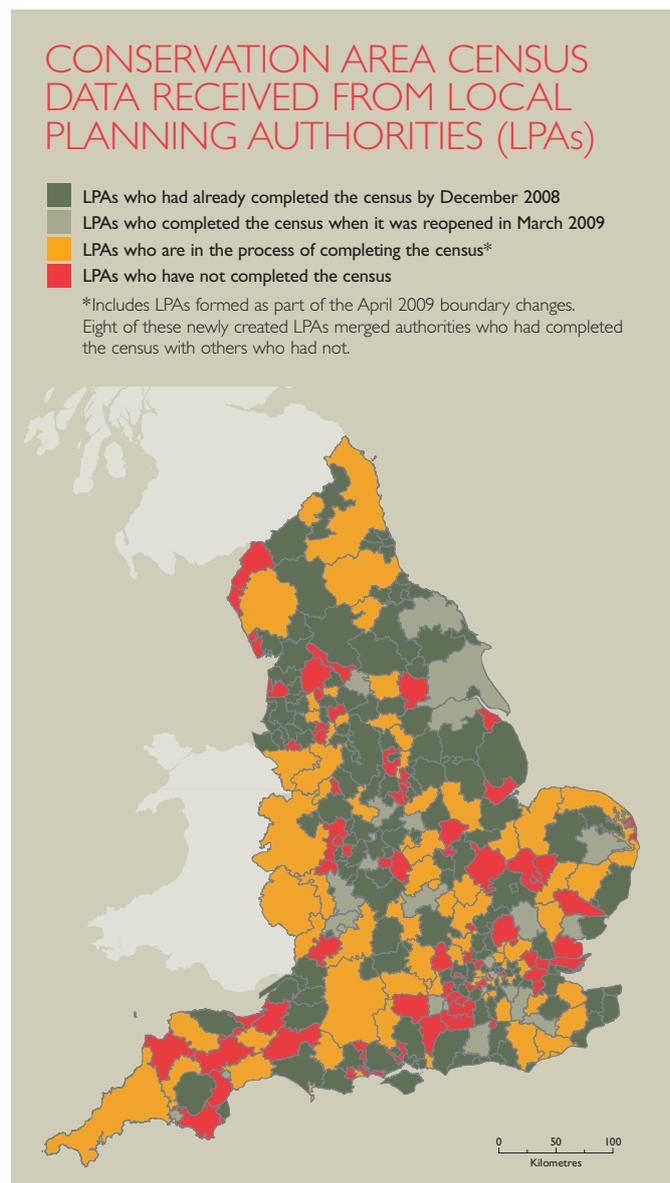

As a result of our national survey we now have clear evidence that a conservation area is more likely to improve if the local authority has a dedicated conservation officer or an elected member who has been appointed as a heritage champion to promote the historic environment within the council.

Looking after conservation areas is a responsibility we all share – those of us who visit them to work or for enjoyment, those of us who own homes and businesses in them, those of us whose job it is to manage the spaces between the buildings and make decisions about their future.

Armed with the kind of robust information provided by this year's survey we and our regional partners will from now on be able to direct resources and investment much more accurately towards those conservation areas at greatest risk, and those with the greatest potential to improve the quality of life and economic prospects of people in the villages, towns and cities of which they are such crucially important components.

In the South East our priorities are to encourage local authorities to maintain or increase their conservation staffing levels during this period of financial constraint so that conservation areas are put at no further or greater risk. We will make sure that our own limited resources are targeted at those areas

most in need of our help and expertise. At the same time, we will work with local partners to address in particular the risks to conservation areas in our seaside towns. Prolonged under-investment has been a key factor in their decline and we will work to ensure that local heritage fulfils its potential in regenerating these communities.

# Reducing the risks

English Heritage is committed to securing a year-on-year reduction in the number of heritage sites at risk. This will be challenging with the additional assets now on the register and the varying nature of risk to each asset type. Each asset type and individual case will require a different approach and solution.

There are, however, approaches that are important for all assets at risk. Resolving cases requires working in close partnership with owners, local planning authorities and other relevant organisations and partners.

Advice and understanding are essential. Historic Environment Records, maintained by local authorities, provide a repository of information on local historic assets. They underpin the work of local-authority historic-environment services and can help improve the protection, conservation and management of heritage assets.

English Heritage provides on-line advice and guidance to local authorities, owners and managers of sites through the Historic Environment Local Management (HELM) website [www.helm.org.uk](http://www.helm.org.uk).

Maintenance of heritage assets is essential to help prevent sites becoming 'at risk', and those that are already at risk from decaying further and the escalation of cost of their repair and consolidation. Buildings, for instance, decay rapidly when left empty. Avoiding vacancy through short-term lets or schemes that provide property protection through residential occupation are low-cost approaches that can maintain buildings until a permanent solution can be found.

## LISTED BUILDINGS

English Heritage's role in securing the future of buildings at risk is primarily to provide practical advice, guidance and resources to local authorities and owners. English Heritage's involvement in cases is determined by the importance of the building and the complexity of the issues. English Heritage can help with analysis of the issues, investigation of the feasibility of options and brokering solutions. Although buildings at risk will continue to be a priority for English Heritage repair grants, grant-aid is limited in relation to demand. Grants from other public sources, notably the Heritage Lottery Fund, continue to be essential in helping secure the future of buildings at risk.

In exceptional cases, English Heritage may acquire and repair a particularly important building at risk, where it is clear that the scale and complexities are such that direct involvement is the best way of securing its long-term future.

Local authorities have a primary role in protecting the historic environment. The creation of a local 'at-risk' register is the first step in tackling neglected buildings in

order to assess and monitor the scale of the problem and prioritise resources and action. Local authorities can also take action to secure the preservation of historic buildings through the use of statutory notices. Some councils have a successful track record, but generally these powers are under-used. It is essential that local authorities make best use of their powers to secure buildings at risk, to 'stop the rot' and prevent the costs escalating beyond the point where it is economic to repair.

To help local authorities make more frequent and timely use of their statutory powers, English Heritage runs a grant scheme to underwrite a significant proportion of the irrecoverable costs involved in serving Urgent Works and Repairs Notices.

Building preservation trusts can be the key to saving buildings at risk. Some trusts cover geographical areas; others specialise in particular types of building or are formed to save just one building. Determined individuals and trusts have saved numerous buildings at risk, working in partnership with other organisations such as local and national amenity societies, including Save Britain's Heritage, the Society for the Protection of Ancient Buildings, The Victorian Society and the Georgian Group.

## SCHEDULED MONUMENTS

Although a significant proportion of scheduled monuments remain at risk, in many cases the problems can be reduced by either small changes to land management or better-informed decision-making. This is reinforced by the success in reducing the number of monuments at risk since the release of the interim figures in 2008, which shows how the simple act of disseminating information and advice can go a long way towards improving condition. English Heritage provides on-line advice to the owners and managers of sites via the Historic Environment Local Management web site [www.helm.org.uk](http://www.helm.org.uk); through its Historic Environment Field Advisers and through the network of local authority Historic Environment Countryside Advisers that we have co-sponsored with local authority partners.

While many owners and managers of scheduled monuments address their long-term care on a voluntary basis, some monuments do require significant resources in order to stabilise their condition, to carry

out repairs, or to change the way in which the land on and around them is used. English Heritage therefore works closely with the Heritage Lottery Fund to identify important sites deserving grant-aid and in partnership with Natural England who delivers the Environmental Stewardship agri-environment scheme on behalf of Defra.

The English Heritage National Monuments Record and local authority Historic Environment Records have increased the information available to land managers and we are continuing to develop their services, most recently through the Selected Heritage Inventory for Natural England (SHINE) project, through which owners will be able to view online information on scheduled monuments and other archaeological features on their holdings.

In all cases – whether for rural or urban monuments – close co-operation with owners and land managers is the key to making further progress.

## PARKS AND GARDENS

The registered status of parks and gardens is a material consideration in the determination of planning applications. The new PPS 15 and its companion guidance will therefore help planning authorities to assess and mitigate the impact of development on our irreplaceable heritage of designed landscapes.

English Heritage can engage only with the highest-priority proposals for change and we shall be reviewing our priorities for casework as a result of this year's Heritage at Risk register findings. We shall also continue to support the professional training courses and apprenticeship schemes that are vital to the long-term conservation of England's historic parks and gardens.

English Heritage encourages the development of conservation management plans for registered historic parks and gardens, especially those in complicated multiple ownership. We are also keen for bursars and estate teams to use management plans to help conserve important but fragile landscapes in the care of schools, hospitals, hotels and other institutional owners.

Following our recent review of the grading of registered cemeteries we are committed to helping communities to raise awareness of the importance of their historic burial grounds. Towards this end, a new advice note on the conservation of memorials will also be published this summer as a successor to our more general guidance on the conservation of historic cemeteries, *Paradise Preserved*.

## BATTLEFIELDS

The limited level of statutory protection that registered battlefields receive means that there is relatively modest direct impact that English Heritage can have on their future. English Heritage will work with owners to develop management plans for registered sites, and in appropriate cases, assist with funding management

plans. We will develop positive landscape strategies with owners and partners such as Defra. In some circumstances, we may encourage the conversion from arable to pasture of especially sensitive locations to protect the battlefield archaeology and as part of a wider drive to prevent unauthorised or damaging metal-detecting.

English Heritage will also continue to encourage greater access to battlefields and improve their amenity value and visitors' appreciation of the impact these historic events had on our development as a nation.

Local authorities can help reduce the risk to battlefields by designating registered battlefields as conservation areas, providing further protection and making sure that registered battlefields are explicitly taken into account in Local Development Frameworks. Local authorities can also invite comments from the Battlefields Trust on planning applications affecting the setting of registered sites.

## WRECK SITES

At the strategic level, the major sources of risk to designated wreck sites have now been identified, and in terms of high-priority sites practical requirements have been identified in conservation management plans.

Risks to protected wreck sites can often be reduced through education, provision of marker buoys, or planning policies that take full account of their national importance. However, some sites require significant resources to stabilise their condition or to carry out detailed archaeological assessments of their conservation requirements. Although English Heritage has statutory power to allocate funds to promote the preservation and maintenance of protected wreck sites, its financial resources can solve only a small proportion of the problems.

In spite of the inherent difficulties with caring for this type of site, careful management must be maintained if we are to pass them on to future generations in as good a condition as reasonably possible. It is therefore close co-operation between the owners of protected wreck sites (where known), authorised divers and all organisations charged with care for the marine and coastal environment that will make the real difference to their long-term survival.

Practical advice on the management of historic wreck sites, whether at the coast-edge or under water, is available from English Heritage's Maritime Archaeology Team ([maritime@english-heritage.org.uk](mailto:maritime@english-heritage.org.uk)) and from [www.helm.org.uk](http://www.helm.org.uk).

# Publications and guidance

English Heritage has produced the following publications relating to heritage at risk:

- *Buildings at Risk: A New Strategy* (1998)
- *Conservation Areas at Risk* (2009) public campaign booklet
- *Conservation Areas at Risk* (2009) campaign leaflet for local authorities
- *Monuments at Risk* (2008) – summary of scheduled monuments at risk in each of our nine regions: East Midlands, East of England, London, North-East, North-West, South-East, South-West, West Midlands, Yorkshire and the Humber
- *Protected Wreck Sites at Risk: A Risk Management Handbook* (2007)

## HERITAGE AT RISK ON THE WEB

To find out more about the Heritage at Risk programme visit [www.english-heritage.org.uk/risk](http://www.english-heritage.org.uk/risk) where you will find an interactive database providing detailed information on all heritage sites at risk nationally.

For further information about the different classes of designated heritage assets, including listed buildings, scheduled monuments, registered parks and gardens, registered battlefields and protected wreck sites visit the Heritage Protection section of our website [www.english-heritage.org.uk/heritageprotection](http://www.english-heritage.org.uk/heritageprotection)

## CONSERVATION POLICIES AND GUIDANCE

The following publications are among the numerous helpful guidance documents now available on our website: [www.english-heritage.org.uk/helm](http://www.english-heritage.org.uk/helm)

*Conservation Principles, Policies and Guidance for the Sustainable Management of the Historic Environment* (2008)

*Enabling Development and the Conservation of Significant Places* (2008)

*Guidance on the Management of Conservation Areas* (2006)

*Guidance on Conservation Area Appraisals* (2006)

Guidance Notes and Application Forms for Grants to Local Authorities

- *Grants to Local Authorities to Underwrite Urgent Works Notices* (1998)
- *Acquisition Grants to Local Authorities to Underwrite Repairs Notices* (1998)
- *Grants for Historic Buildings, Monuments and Designed Landscapes* (2004)

*Managing Local Authority Heritage Assets: Some Guiding Principles for Decision Makers* (2003)

*Paradise Preserved: An Introduction to the Assessment, Evaluation, Conservation and Management of Historic Cemeteries* (2002)

*Stopping the Rot: A Step by Step Guide to Serving Urgent Works and Repairs Notices* (1998)

*The Disposal of Historic Assets: Guidance Note for Government Departments and Non-Departmental Public Bodies* (1999)

Further copies of this register and those for the other eight English regions are available free of charge from:

# The register: content and criteria

## DESIGNATION

All of the historic environment matters – but there are some elements which warrant extra protection through the planning system. Ever since 1882, when the first Act protecting archaeology was passed, government has been developing the designation system. Listing emerged from the post-blitz 1940s Planning Acts, and is now applied to about half a million buildings ranging from palaces to street lamps. Around 20,000 archaeological sites are scheduled, which introduces tight management controls, and some 1600 designed landscapes are registered, as are 43 battlefields.

English Heritage, as the government's expert adviser, is responsible for making recommendations – but it is still the Secretary of State at the DCMS who makes the decisions. Understanding and appreciation develop constantly, which makes keeping the designation base up to date a never-ending challenge. While responding to threat-driven cases, we also seek to work strategically. Recent developments have seen a greater striving for openness, and better communication of what makes something special. This register includes the following heritage assets at risk:

- Grade I and II\* listed buildings and structural scheduled monuments
- scheduled monuments (archaeological sites)
- registered parks and gardens (including cemeteries)
- registered battlefields (where applicable)
- protected wreck sites (where applicable)
- conservation areas.

## LISTED BUILDINGS

### Definition

A listed building is a building (or structure) that has been designated as being of 'special architectural or historic interest'. The older and rarer a building is, the more likely it is to be listed. Buildings less than 30 years old are listed only if they are of outstanding quality and under threat.

Listed buildings are graded I, II\* and II. Grade I and II\* are particularly important buildings of outstanding interest; together they amount to 8% of all listed buildings. The remaining 92% are of special interest and are listed Grade II.

Entries on the statutory list of buildings of special architectural or historic interest may comprise a number of separate buildings. Formal residential terraces are the most obvious example. Entries on this register reflect how buildings are grouped and recorded on the statutory list.

Structures can occasionally be both listed and scheduled as monuments.

## Criteria for inclusion on this register

Buildings included on this register are listed Grade I and II\*, and some are structural scheduled monuments. Buildings are assessed for inclusion on the register on the basis of condition and, where applicable, occupancy (or use). The condition of buildings on the register ranges from 'very bad' to 'poor', 'fair' and (occasionally) 'good'. The register also includes buildings that are vulnerable to becoming at risk because they are empty, under-used or face redundancy without a new use to secure their future.

Occupancy (or use) is noted as 'vacant', 'part-occupied', 'occupied', or occasionally, 'unknown'; for many structural monuments, occupancy is not applicable.

Assessing vulnerability in the case of a building in fair condition necessarily involves judgement and discretion. A few buildings on the register are in good condition, having been repaired or mothballed, but a new use or owner is still to be secured.

Buildings are removed from the 'at risk' register when fully repaired/consolidated, their future secured, and where appropriate, occupied.

## Priority for action

Once a building is identified as at risk or vulnerable and included on the register, priority for action is assessed on a scale of A to F, where 'A' is the highest priority for a building which is deteriorating rapidly with no solution to secure its future, and 'F' is the lowest priority where a repair scheme is in progress and an end use has been secured.

## SCHEDULED MONUMENTS

### Definition

Scheduled monuments are our most valued archaeological sites and landscapes, England's 19,719 examples have been designated because of their national importance. Scheduled monuments are not graded, and most have limited potential for beneficial use. They span more than 6,000 years of human activity, from prehistoric burial mounds to 20th-century military and industrial remains. For the millennia before written history scheduled monuments are the only testament to innumerable generations of people of whom there is no other record.

The later 20th century saw unprecedented changes to the landscape. As a result, types of historic site that once were commonplace began to become rare. Those that survive often represent just small islands of what once characterised broad sweeps of our towns and countryside. Although protected by law, scheduled monuments are still at risk from a wide range of processes. In particular, they can frequently be exposed to intense pressures beyond the reach of the

planning system. These include damage from cultivation, forestry and – often most seriously of all – wholly natural processes such as scrub growth, animal burrowing and erosion.

### Criteria for inclusion on this register

Once damaged or destroyed, scheduled monuments and the information they contain cannot be replaced. In 2008 English Heritage surveyed the condition of each of the nation's scheduled monuments. This has allowed the identification of national and regional priorities for action. All the monuments included in this regional register have been identified as being 'at risk'. Put simply, this means that on the basis of their current condition and vulnerability they are susceptible to significant loss to their fabric in the near future. They are then further sub-divided in terms of the severity of the threat that they face, ranging from those in 'optimal' condition (the best that can be achieved) to others whose 'extensive significant problems' are likely to be more difficult to resolve.

## HISTORIC PARKS AND GARDENS

### Definition

There are 1,600 designed landscapes on the current English Heritage Register of Historic Parks and Gardens of Special Historic Interest. These registered landscapes, which can be Grade I, II\* or II, include private gardens, public parks and other green spaces, country estates and cemeteries. They are valued for their beauty, diversity and historical importance but in contrast to the number of listed historic buildings this is a very small group of assets.

Inclusion on the register of parks and gardens brings no additional statutory controls, but it is a material consideration in the determination of planning applications. Local authorities are required to consult English Heritage on applications affecting sites registered as Grade I or II\* and the Garden History Society on sites of all grades.

### Criteria for inclusion on this register

The identification of sites at risk begins with a desk-top appraisal of the condition and vulnerability of each registered park and garden. This allows them to be provisionally categorised as at low, medium or high risk. These rankings are then checked by our regional expert advisers and adjusted to reflect steps already taken by owners to address problems.

Sites assessed as being at risk are typically affected by development and neglect. They have frequently been altered by development or are faced with major change. They are generally not protected by conservation management plans or conservation area status. The original function of these landscapes has often changed; divided ownership may also have resulted in the loss of the cohesive character

of the place. Unless the entry gives information on the state of repair of the site as a whole, it should not be assumed that the surroundings are themselves at risk.

## CONSERVATION AREAS

### Definition

Conservation areas are areas of special architectural or historic interest the character or appearance of which it is desirable to preserve or enhance. Designated by local authorities, for more than 40 years they have proved a highly effective mechanism for managing change on an area-wide basis. There are currently some 9,300 in England including town and city centres, suburbs, industrial areas, rural landscapes, cemeteries and residential areas. They form the historic backcloth to national and local life and are a crucial component of local identity and community cohesion.

### Criteria for inclusion on this register

In the first survey of its kind ever undertaken, English Heritage in 2008 asked every local authority in England to fill out a census form for each of its conservation areas. Responses were received for approximately 60% of conservation areas, highlighting current threats and trends. Based on the local authority's own assessment, those which have deteriorated over the last three years, or are expected to do so over the next three years, are defined as being at risk – 1 in 7, or about 14% of the total in the survey.

This is the first step in building up a comprehensive national picture of the condition of England's conservation areas. At present, the survey is incomplete, so the results need to be treated with caution. However, understanding the emerging trends will help English Heritage and local authorities to address those at greatest risk, and to mobilise local groups to reinforce their support for the historic environment in communities across the country.

## BATTLEFIELDS

### Definition

English Heritage's register of historic battlefields has identified 43 nationally significant sites ranging in date from 991 to 1685. These are places where people risked their lives fighting for a cause; reputations were made or lost, history was set and people died. The outcome of these battles was influenced by where they were fought and traces of the events of the day will have been left across the landscape. Battlefields are cherished for many reasons, as a commemoration of the event and those who died, as a resource for understanding the course of the battle, and for the light they can shed on the times in which the battle was fought. They are vulnerable to insensitive development and to poorly managed investigation such as large-scale metal-detecting. While this designation introduces no

additional statutory controls, one of its primary objectives is to encourage policies and other mechanisms that ensure that change and development affecting battlefields are sensitive and appropriate.

### Criteria for inclusion on this register

Of the 43 registered battlefields, 7 are deemed to be at risk of loss of historic significance and are included on this register. The identified risks and threats come from:

- development pressure – for example, because they lie on urban fringes or are subject to development pressures within the site
- arable cultivation
- unregulated metal-detecting.

One major impact or a combination of several factors can be enough to raise the risk at a particular site. Of the seven sites deemed to be most at risk, five are in decline and two are stable.

## WRECK SITES

### Definition

England's 46 protected wreck sites represent a tiny proportion of the 32,476 pre-1945 wrecks and recorded casualties that are known to lie in the territorial sea – just 1 in 706. Wreck sites can be of importance for different reasons: the distinctive design or construction of a ship, the story it can tell about its past, its association with notable people or events, its cargo, flora and fauna or its role as a focus for the local community.

The Protection of Wrecks Act 1973 empowers the appropriate Secretary of State to designate a restricted area around a vessel to protect it or its contents from unauthorised interference. Local authorities are able to react to foreshore infrastructure projects through the planning process, thereby securing the preservation of important remains in this intertidal zone.

### Criteria for inclusion on this register

In 2009 English Heritage audited all designated wreck sites to better understand their current condition and vulnerability, the way they are being managed, and what needs to be done to ensure that their significance is maintained for present and future generations. As a result, nine sites were deemed to be at risk.

# Key to the entries

## ORDER

Entries are grouped and ordered alphabetically first by county or unitary authority, and then by local planning authority (unitary authority/national park/district or borough).

Asset types are grouped within the relevant planning authority in the following order:

- listed buildings and structural monuments
- scheduled monuments
- registered parks and gardens
- registered battlefields
- protected wreck sites are listed at the end of the county or unitary authority off which they are located.

Within each asset type, sites are ordered alphabetically by parish and site name.

Conservation areas at risk are listed together on page 88.

## DESIGNATION

The lead designation is noted for each entry, and includes:

- Listed Building (LB) Grade I, II\* or II
- Scheduled Monument (SM)
- Registered Park and Garden (RPG) Grade I, II\* or II
- Registered Battlefield
- Protected Wreck Site
- Conservation Area (CA)
- World Heritage Site (WHS).

For buildings and registered parks and gardens, other designations that apply to each site are also noted.

Their location within a conservation area or World Heritage Site is noted where applicable.

Given the difference in each asset type and also the varying nature of the risks to which they are exposed, there will inevitably be differences in how risk is assessed and how the information is categorised.

## CONDITION

For buildings at risk, condition is graded as: 'very bad', 'poor', 'fair' and 'good'.

For sites that cover areas (scheduled monuments, registered parks and gardens and wreck sites) one overall condition category is recorded. The category may relate only to the one part of the site or monument that is at risk and not the whole site:

- extensive significant problems (i.e. under plough, collapse)
- generally unsatisfactory with major localised problems

- generally satisfactory but with significant localised problems
- generally satisfactory but with minor localised problems
- optimal (ie the best we can realistically expect to achieve)
- significant decline
- unknown.

'Unknown' is noted for a number of scheduled monuments that are below-ground and where their condition cannot be established.

## OCCUPANCY

For buildings that can be occupied or have a use, the main vulnerability is vacancy, or under-use. Occupancy (or use) is noted as follows:

- vacant
- part occupied
- occupied
- unknown
- not applicable.

## VULNERABILITY

Principal Vulnerability is noted for scheduled monuments and may relate only to the part of the monument which is at risk, and include:

- animal burrowing
- arable ploughing
- coastal erosion
- collapse
- deterioration
- scrub / tree growth
- visitor erosion.

For registered parks and gardens, vulnerability is noted as high, medium and low.

## PRIORITY

For buildings at risk, the following priority categories are used as an indication of trend and as a means of prioritising action:

- A** Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.
- B** Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.
- C** Slow decay; no solution agreed.
- D** Slow decay; solution agreed but not yet implemented.
- E** Under repair or in fair to good repair, but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).
- F** Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

If the priority category has changed since the 2008 register, the previous category is given in brackets.

## TREND

Trend for scheduled monuments, registered parks and gardens, battlefields and wreck sites may relate only to the part of the site that is at risk and is categorised as:

- declining
- stable
- improving
- unknown.

## OWNERSHIP

A principal ownership category is given for each entry, although many scheduled monuments, registered parks and gardens, and battlefields are in divided ownership. For registered parks and gardens, single or multiple ownership is noted.

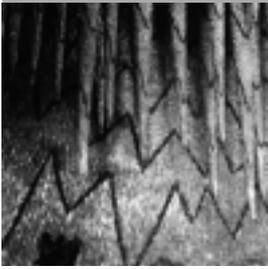

## CONTACT

This is the member of the English Heritage regional team who acts as a first point of contact for the case, and to whom enquiries should be addressed. We are not in any sense agents for the owners of the sites included, but we will endeavour to put people in touch with them where appropriate.

## BRACKNELL FOREST (UA)

SITE NAME: **Grotto in Grounds of Ascot Place, Pigeon House Lane, Ascot, Winkfield**

DESIGNATION: Listed Building Grade I, RPG II\*

CONDITION: Good

OCCUPANCY: Not applicable

PRIORITY: E (E)

OWNERSHIP: Company

Exceptionally fine grotto of circa 1750 with numerous chambers decorated with stalactites, finished with mineral ores, and zig-zag bonding which was the 'trademark' of Josiah Lane and his father. External repairs completed and structure now sound and weather tight. Work on interior repairs and flood prevention measures ongoing.

Contact: Kathryn Davies 01483 252028

SITE NAME: **Newbold College (formerly Moor Close), Binfield**

DESIGNATION: Registered Park and Garden Grade II\*, also 7 LBs

CONDITION: Extensive significant problems

VULNERABILITY: Low

TREND: Deteriorating

OWNERSHIP: Corporate, single owner

Moor Close estate, now the home of Newbold College, includes an Edwardian mansion which was Oliver Hill's first house and garden design in an early C20 Arts & Crafts style. The intricately designed gardens comprise fragile fabric which is deteriorating and in need of renovation. A condition survey has been completed with grant from English Heritage; further resources and action are urgently needed. A recent pre-application to the Heritage Lottery Fund was unsuccessful.

Contact: Charlotte McLean 01483 252076

SITE NAME: **Broadmoor Hospital, Crowthorne**

DESIGNATION: Registered Park and Garden Grade II, also 1 LB

CONDITION: Extensive significant problems

VULNERABILITY: High

TREND: Deteriorating

OWNERSHIP: Corporate, single owner

A mid C19 asylum, built for the criminally insane to designs by Joshua Jebb. There are extensive contemporary gardens and ornamented farmland. The site remains in use as a secure psychiatric hospital but its historic layout is not addressed in its grounds management.

Contact: Charlotte McLean 01483 252076

## BRIGHTON AND HOVE, CITY OF (UA)

SITE NAME: **The West Pier, Kings Road, Brighton**

DESIGNATION: Listed Building Grade I, CA

CONDITION: Very bad

OCCUPANCY: Not applicable

PRIORITY: A (A)

OWNERSHIP: Trust

Pier, 1864-66 by Eugenius Birch. Closed in 1975. English Heritage has declared its view that the combination of significant recent damage and cost of repair make restoration from public funds uneconomic.

Contact: Tom Foxall 01483 252035

SITE NAME: **Marlborough House, 54 Old Steine, Brighton and Hove, Brighton**

DESIGNATION: Listed Building Grade I, CA

CONDITION: Poor

OCCUPANCY: Part occupied

PRIORITY: C (New)

OWNERSHIP: Private

House, now office. Built 1765, remodelled in 1786 by Robert Adam. Not structurally sound, secure or weathertight and with a dry rot outbreak.

Contact: Tom Foxall 01483 252035

SITE NAME: **The stables at Stanmer House, Stanmer Park, Brighton**

DESIGNATION: Listed Building Grade II\*, CA

CONDITION: Poor

OCCUPANCY: Part occupied

PRIORITY: D (D)

OWNERSHIP: Private

Stables probably C18. Much altered and largely empty for some years.

Contact: Tom Foxall 01483 252035

## PRIORITY (FOR BUILDINGS)

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

**D**  
Slow decay, solution agreed but not yet implemented.

**E**  
Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

SITE NAME: **Mews building to the rear of No. 14, 14 Brunswick Square, East Sussex, Hove**

Terraced house, 1825-7. Mews to the rear of 14, Brunswick Square circa 1825. Repair works underway, but not complete.

DESIGNATION: Listed Building Grade I, CA

CONDITION: Very bad

OCCUPANCY: Part occupied

PRIORITY: B (A)

OWNERSHIP: Company

Contact: Tom Foxall 01483 252035

SITE NAME:

**Stanmer Park, Stanmer**

DESIGNATION:

Registered Park and Garden Grade II, also part in CA, 19 LBs, 3 SMs

CONDITION:

Extensive significant problems

VULNERABILITY:

High

TREND:

Deteriorating

OWNERSHIP :

Local Authority, single owner

Stanmer is an C18 estate village set in a landscape park with informal pleasure grounds. Brighton Borough bought it in 1947 as a public amenity but it has now declined due to uncoordinated management, under-resourcing and redundant historic estate buildings. A Stewardship plan (2003) made proposals for conserving and enhancing the landscape including rationalisation of access but progress is limited. Focussed leadership to implement a revised management plan is needed. Part of the park is also in the district of Lewes.

## BUCKINGHAMSHIRE

### AYLESBURY VALE

SITE NAME: **Barn at New Manor Farm, Broughton Lane, Birtton with Broughton**

Barn, late C12 and later. Propped with scaffolding and with a temporary roof covering. Urgent works have been carried out. Slow decay: no solution. A historic building analysis has been carried out with English Heritage grant aid.

DESIGNATION: Listed Building Grade II\*

CONDITION: Poor

OCCUPANCY: Vacant

PRIORITY: C (C)

OWNERSHIP: Private

Contact: Kathryn Davies 01483 252028

SITE NAME: **Dinton Castle, Aylesbury Vale, Dinton**

Folly, 1796, built as eyecatcher for Dinton Hall. Octagonal 'gothic' structure, now with major structural cracking. On the point of collapse as the lintels rot behind arches. Local council has undertaken urgent repairs.

DESIGNATION: Listed Building Grade II\*

CONDITION: Very bad

OCCUPANCY: Not applicable

PRIORITY: A (A)

OWNERSHIP: Private

Contact: Kathryn Davies 01483 252028

SITE NAME: **Ashfold School (Dorton House), Dorton**

Early C17, dated 1626 on staircase soffit, altered 1784. Contains extremely elaborate C17 plaster ceilings in several rooms and under staircase soffits. The building has been occupied for many years as a school. The roofs, stonework and the condition of the lintels all give cause for concern. The fine plaster ceilings are vulnerable to water damage and this is already occurring.

DESIGNATION: Listed Building Grade I

CONDITION: Poor

OCCUPANCY: Occupied

PRIORITY: C (C)

OWNERSHIP: Private

Contact: Kathryn Davies 01483 252028

SITE NAME: **Mentmore Towers, Mentmore**

Building vacant for a number of years. LBC and planning permission granted for conversion to a hotel together with a major extension. Planning for the implementation of these consents has recently stopped, some emergency work has been carried out but roof repairs are outstanding. Leaks are damaging the interior including decorative plasterwork in the principal rooms.

DESIGNATION: Listed Building Grade I, RPG II\*

CONDITION: Fair

OCCUPANCY: Vacant

PRIORITY: A (A)

OWNERSHIP: Company

Contact: Kathryn Davies 01483 252028

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

SITE NAME: **Halton House, Halton**

DESIGNATION: Registered Park and Garden Grade II, also part in CA, 5 LBs

CONDITION: Extensive significant problems

VULNERABILITY: High

TREND: Deteriorating

OWNERSHIP: Corporate, single owner

A Rothschild country house with late C19 formal gardens and park with woodland rides. The estate was used by the Army during WW1, when many trees were cut down, and was sold to the RAF in 1918. Halton House is now the Officers' Mess. Some of the ornamental features of the garden are in poor condition, including the pavilion in the Italian garden which is derelict. New developments being discussed include a car park extension. There is no Conservation Management Plan for the gardens.

Contact: Charlotte McLean 01483 252076

SITE NAME: **Mentmore Towers, Mentmore**

DESIGNATION: Registered Park and Garden Grade II\*, also CA, 10 LBs

CONDITION: Extensive significant problems

VULNERABILITY: High

TREND: Stable

OWNERSHIP: Mixed, multiple owners

Sir Joseph Paxton designed the park and gardens for Mentmore Towers. The house and gardens were sold in 2000 and permission granted in 2005 to convert to an hotel. The adjacent golf course has since been bought by the developer thus reuniting most of the site. The permission has not yet been implemented leaving Mentmore's future uncertain.

Contact: Charlotte McLean 01483 252076

## SOUTH BUCKS

SITE NAME: **Aviary at Dropmore House,  
Heathfield Road,  
Taplow**

DESIGNATION: Listed Building Grade I, RPG II

CONDITION: Very bad

OCCUPANCY: Not applicable

PRIORITY: B (B)

OWNERSHIP: Private

Aviary, early C19, situated on south side of the range of buildings to west of the house. Vandalised and neglected for some years. Situated within late C18 to early C19 gardens in a ruinous condition. The woodland to the north and west in a poor condition. The park to south and east is in good condition. Planning permission/conditional LBC granted for repair and conversion of mansion including Aviary.

Contact: Kathryn Davies 01483 252028

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

## FAREHAM

SITE NAME: **Barn at Fernhill Farm,  
Mill Lane,  
Titchfield**

Tithe barn, probably C15, formally part of Titchfield Abbey. Has been damaged by casual vandalism and needs repair and a new use.

DESIGNATION: Listed Building Grade I, SM, CA

CONDITION: Fair

OCCUPANCY: Vacant

PRIORITY: C (New)

OWNERSHIP: Company

Contact: Richard Massey 01483 252046

SITE NAME: **Fort Fareham,  
Newgate Lane,  
Fareham**

Mid C19 fort forming part of a series of fortifications built to defend Portsmouth Harbour. Unoccupied parts suffering from decay and vandalism. Site now owned by various private companies.

DESIGNATION: Listed Building Grade II, SM

CONDITION: Poor

OCCUPANCY: Part occupied

PRIORITY: A (A)

OWNERSHIP: Company

Contact: Richard Massey 01483 252046

SITE NAME: **Titchfield Abbey and fishponds – Stables,  
Mill Street, Titchfield,  
Fareham**

Stables to Titchfield Abbey. The Abbey was founded in 1232 and converted to a private residence in 1537. The stables are overgrown with vegetation and have some structural problems. A repair programme is under discussion with the new owner.

DESIGNATION: Scheduled Monument, CA

CONDITION: Fair

OCCUPANCY: Not applicable

PRIORITY: D (D)

OWNERSHIP: Private

Contact: Richard Massey 01483 252046

## GOSPORT

SITE NAME: **Fort Elson, RNAD,  
Military Road,  
Gosport**

Polygonal artillery fort. 1853-60. Work has been undertaken to check vegetation which is causing the masonry to fail. The fort is within a secure armaments depot so not available for disposal. A management plan is being developed by Defence Estates with discussion with English Heritage to agree a management regime. The building cannot be occupied because of its location.

DESIGNATION: Scheduled Monument

CONDITION: Poor

OCCUPANCY: Vacant

PRIORITY: C (C)

OWNERSHIP: Government

Contact: Alan Johnson 020 7973 3174

SITE NAME: **Fortifications north of Mumby Road,  
Mumby Road,  
Gosport**

A 600m length of the western fortifications of Gosport dating from circa 1770. Discussions on redesign of security fencing in 2006 but no action. Excluded from major redevelopment scheme covering adjoining barracks. There is no foreseeable future use for the site.

DESIGNATION: Scheduled Monument, CA

CONDITION: Fair

OCCUPANCY: Not applicable

PRIORITY: C (C)

OWNERSHIP: Government

Contact: Rory O'Donnell 020 7973 3775

SITE NAME: **Railway Station Old Terminal,  
Spring Garden Lane,  
Gosport**

Railway station circa 1842, by Sir William Tite, for the London and South Western Railway Company. Damaged by bombing. Stable but unexploited ruin, now with consent for a housing scheme, on which works should start shortly.

DESIGNATION: Listed Building Grade II\*, CA

CONDITION: Fair

OCCUPANCY: Vacant

PRIORITY: D (D)

OWNERSHIP: Housing Association

Contact: David Brock 01483 252044

## PRIORITY (FOR BUILDINGS)

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

**D**  
Slow decay, solution agreed but not yet implemented.

**E**  
Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

SITE NAME: **Gilkicker Fort,  
Fort Road, Gilkicker Point,  
Gosport**

DESIGNATION: Listed Building Grade II\*, SM

CONDITION: Poor

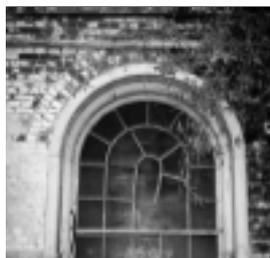

OCCUPANCY: Vacant

PRIORITY: D (D)

OWNERSHIP: Local authority

Artillery fort 1865-71. Owner has put barrack block into good order; but casemates and magazines are threatened by water penetration. Repair and conversion to residential development being considered.

Contact: Richard Massey 01483 252046

SITE NAME: **Workshops, Boilerhouse & Engine Room,  
Haslar Gunboat Yard,  
HMS Dolphin, Gosport**

DESIGNATION: Scheduled Monument, CA

CONDITION: Poor

OCCUPANCY: Vacant

PRIORITY: A (A)

OWNERSHIP: Company

Workshop, boiler house and offices, mid C19, cause concern. The buildings are already in a poor state of repair and are deteriorating. Parts are no longer stable (including sections of the workshops roof). There is no current use.

Contact: Richard Massey 01483 252046

SITE NAME: **Guardrooms to Haslar Gunboat Yard,  
Haslar Road, HMS Dolphin,  
Dolphin 3, Gosport**

DESIGNATION: Scheduled Monument, CA

CONDITION: Poor

OCCUPANCY: Vacant

PRIORITY: C (C)

OWNERSHIP: Government

Unoccupied and in need of more permanent repair. Also known as buildings 85 and 139, The Old Gatehouses, HMS Dolphin, Dolphin 3.

Contact: Alan Johnson 020 7973 3174

## HART

SITE NAME: **Garden walls and associated structures,  
Bramshill House,  
Bramshill**

DESIGNATION: Listed Building Grade I, RPG II\*

CONDITION: Poor

OCCUPANCY: Not applicable

PRIORITY: D (D)

OWNERSHIP: Government

Walls to early C17 and C18 formal walled gardens, surrounding the house, which is situated within a park of medieval origin, landscaped in the C17, C18 and C19. Some sections of the walls are in a poor condition and a section of the wall to west of the house collapsed in 2003. A scheme for repair is in preparation for all the walls.

Contact: Elizabeth Moore 020 7973 3803

SITE NAME: **High Bridge,  
Bramshill House,  
Bramshill**

DESIGNATION: Listed Building Grade I, RPG II\*

CONDITION: Fair

OCCUPANCY: Not applicable

PRIORITY: D (D)

OWNERSHIP: Government

C19 Jacobean-style, arched bridge crossing Broad Water; a lake formed along the course of the River Hart. Bridge is on the main south-west to north-east axis across the park, which has medieval origins and was landscaped in the C17, C18 and C19. Repair scheme implemented in 2000/01 but some works remain outstanding.

Contact: Elizabeth Moore 020 7973 3803

SITE NAME:

**Round barrow cemetery at Heath Brow, Ewshot, Crowthorne**

DESIGNATION:

Scheduled Monument

CONDITION:

Generally unsatisfactory  
with major localised problems

PRINCIPAL VULNERABILITY:

Scrub / tree growth

TREND:

Declining

OWNERSHIP:

Government or Agency

CONTACT:

Simon Goodhugh 01483 252037

SITE NAME:

**Bramshill Park, Bramshill**

DESIGNATION:

Registered Park and Garden Grade II\*,  
also part in CA, 8 LBs

CONDITION:

Extensive significant problems

VULNERABILITY:

High

TREND:

Stable

OWNERSHIP:

Corporate, multiple owners

Bramshill Park comprises early C17 formal walled gardens within a park of medieval origin which was landscaped in the C17 and mid C18 and later deformed and enlarged. The site became the Police Staff College in 1952, the farmland being sold and put under commercial forestry. The site's historic importance is highly vulnerable to the College's requirement for future building and to unsympathetic management of the parkland.

Contact: Charlotte McLean 01483 252076

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

SITE NAME:	<b>Warbrook House, Eversley</b>	Warbrook's gardens with their axial vistas were designed c1724 by the architect John James – whose home it was. Major change occurred in the mid C20 with the conversion of the house to business use and the addition of new buildings and service areas. James' axes extend beyond the gardens but these, and the parkland, are perceived as without beneficial use and have deteriorated. A conservation strategy is urgently needed.

**PRIORITY (FOR BUILDINGS)**

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

**D**  
Slow decay, solution agreed but not yet implemented.

**E**  
Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

SITE NAME:	<b>Embley Park, Wallow</b>
DESIGNATION:	Registered Park and Garden Grade II, also 8 LBs
CONDITION:	Extensive significant problems
VULNERABILITY:	High
TREND:	Unknown
OWNERSHIP :	Mixed, multiple owners

Embley Park is a C19 and early C20 woodland and shrub garden of late C18 origin, once the home of Florence Nightingale. After WWII the estate was divided, the house becoming a school. The school has since reunited some of the park but the rest is divided between more than a dozen owners. This, with inevitable diverse use and maintenance, make it difficult to conserve the fabric and design holistically.

Contact: Charlotte McLean 01483 252076

## WINCHESTER

SITE NAME:	<b>Brambridge House, Kiln Lane, Colden Common</b>
DESIGNATION:	Listed Building Grade II*
CONDITION:	Poor
OCCUPANCY:	Occupied
PRIORITY:	D (F)
OWNERSHIP:	Company

Country house, 1762 and 1872, suffering from deferred maintenance. Some repairs have been carried out but more are needed.

Contact: David Brock 01483 252044

SITE NAME:	<b>Merton Castle, Hursley</b>
DESIGNATION:	Scheduled Monument
CONDITION:	Poor
OCCUPANCY:	Not applicable
PRIORITY:	D (D)
OWNERSHIP:	Company

Norman ringwork with a standing gatehouse surviving as core work. Overgrown and in need of consolidation. English Heritage is in discussion with owner about clearance and consolidation.

Contact: Richard Massey 01483 252046

SITE NAME:	<b>St Peters Church (ruin), Lainston House, Lainston Park, Sparsholt</b>
DESIGNATION:	Listed Building Grade II, SM, RPG II*
CONDITION:	Fair
OCCUPANCY:	Not applicable
PRIORITY:	F (F)
OWNERSHIP:	Company

C12 ruinous chapel, located circa 150m south-west of Lainston House. The ruin was used as a romantic folly in C18 pleasure grounds in which it stands. Requires consolidation. Discussions have taken place and some masonry repairs were carried out in 2005 but lintels especially, give continued cause for concern.

Contact: Richard Massey 01483 252046

SITE NAME:	<b>Walled garden to Lainston House, Lainston Park, Sparsholt</b>
DESIGNATION:	Listed Building Grade II*, RPG II*
CONDITION:	Fair
OCCUPANCY:	Not applicable
PRIORITY:	D (D)
OWNERSHIP:	Company

Hexagonal walled fruit or kitchen garden, c5.3ha, c100m west of the house. Probably C18. Striking polygonal layout. Axial vista from main entrance of house, across forecourt and into walled garden. In use as hotel car park around the sides and planted in the centre. Some fruit trees remains on the walls. In need of basic repairs. The gardens around the house are in good condition, but the park is in arable use.

Contact: David Brock 01483 252044

SITE NAME:	<b>King Johns House, Warnford Park, Warnford</b>
DESIGNATION:	Listed Building Grade I, SM, RPG II
CONDITION:	Poor
OCCUPANCY:	Not applicable
PRIORITY:	B (C)
OWNERSHIP:	Private

Ruinous C13 hall house. A feature within the C18 pleasure grounds of Warnford Park, within which it is situated. Stop gap repairs have been carried out. Requires further consolidation.

Contact: Richard Massey 01483 252046

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

## ISLE OF WIGHT (UA)

SITE NAME: **Northwood House, Ward Avenue, Cowes**

DESIGNATION: Listed Building Grade II\*, CA

CONDITION: Fair

OCCUPANCY: Part occupied

PRIORITY: C (C)

OWNERSHIP: Trust

Large house, 1837, with spectacular interiors. The original service wings have been mainly repaired. The long-term future of this partly-used building is unresolved and maintenance to be addressed in the short term. The cost of full repair is very high.

Contact: David Brock 01483 252044

SITE NAME: **Hammerhead Crane, Thetis Road, West Cowes, Cowes**

DESIGNATION: Listed Building Grade II\*

CONDITION: Poor

OCCUPANCY: Not applicable

PRIORITY: C (C)

OWNERSHIP: Trust

Giant Cantilever Crane, also called 'hammerhead' crane, built 1911. One of a handful of this type of crane now surviving, and witness to a major local industry. Now disused and surrounded by a potential development site.

Contact: David Brock 01483 252044

TREND: Declining

OWNERSHIP: Private

CONTACT: Simon Goodhugh 01483 252037

SITE NAME: **Swaylands, Penshurst**

DESIGNATION: Registered Park and Garden Grade II, also 2 LBs

CONDITION: Generally unsatisfactory with major localised problems

VULNERABILITY: High

TREND: Deteriorating

OWNERSHIP: Private, multiple owners

Swaylands is important for its terraced gardens and pleasure grounds, including extensive rockwork developed in the late C19 around a country house. The property was recently sold to a developer. Work began in 2006 to convert the house into 28 apartments, including the addition of two new wings, and to restore the grounds as well. The project has stalled due to financial difficulties leaving this landscape extremely vulnerable with an uncertain future.

Contact: Charlotte McLean 01483 252076

SITE NAME: **Combe Bank, Sundridge**

DESIGNATION: Registered Park and Garden Grade II\*, also 17 LBs

CONDITION: Extensive significant problems

VULNERABILITY: High

TREND: Deteriorating

OWNERSHIP: Mixed, multiple owners

Combe Bank's gardens and pleasure grounds date from the 1720s and 1740s. After WWI the estate was sold and divided up. The house and gardens becoming a school in 1924. The parkland became derelict after construction of the M25; recent attempts to develop it as a burial ground are unresolved. The gardens suffered considerable storm damage in the late C20 and need resources and specialist guidance to repair them.

Contact: Charlotte McLean 01483 252076

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

## OFF KENT

SITE NAME: **London,  
Thames Estuary**

DESIGNATION: Protected Wreck Site

CONDITION: Extensive significant problems

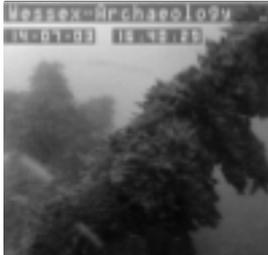

TREND: Natural decline

OWNERSHIP: Government

PHOTO: Wessex Archaeology and the  
Port of London Authority

The London was a Second Rate 'Large Ship' built in Chatham in 1654 during the Interregnum. She is known to have participated in the First Dutch War (1652-4) and later formed part of an English Squadron sent to collect Charles II from the Netherlands and restore him to his throne. The London blew-up on passage from Chatham in March 1665. A series of artefacts have been identified on the river bed and recovered to the surface. In addition an abundance of loose material on the bottom has been noted in a remarkably well preserved state. This suggests that the site has been recently disturbed.

Contact: Simon Goodhugh 01483 252037

SITE NAME: **Northumberland,  
Goodwin Sands**

DESIGNATION: Protected Wreck Site

CONDITION: Extensive significant problems

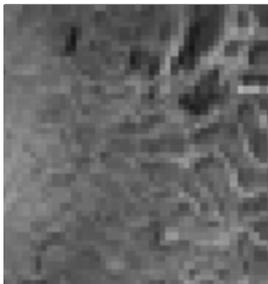

TREND: Significant decline

OWNERSHIP: Government

PHOTO: © Wessex Archaeology

Third rate 70-gun warship built 1678 as part of Samuel Pepys' regeneration of the English navy. The first third rate ship to be built under contract, after it was realised that the naval dockyards could not cope with the construction of the number of ships requested. She foundered on Goodwin Sands during the 'Great Storm' of 1703. The Goodwin Sands change morphology on a seasonal basis leading to periodic exposure of the vessel's wooden hulls. Exposed timbers are weakened by biological attack and may be subject to detachment and dispersal by tide and wave surge during winter storms.

Contact: Simon Goodhugh 01483 252037

SITE NAME: **Restoration,  
Goodwin Sands**

DESIGNATION: Protected Wreck Site

CONDITION: Extensive significant problems

TREND: Significant decline

OWNERSHIP: Government

PHOTO: © University of St Andrews  
and Wessex Archaeology

Although there is no definite evidence, this wreck of a wooden warship is thought to be the remains of the Restoration, a third rate 70-gun warship built 1678 as part of Samuel Pepys' regeneration of the English navy. Along with the Northumberland and Stirling Castle, she foundered on Goodwin Sands during the 'Great Storm' of 1703. The Goodwin Sands change morphology on a seasonal basis leading to periodic exposure of the vessel's wooden hulls. Exposed timbers are weakened by biological attack and may be subject to detachment and dispersal by tide and wave surge during winter storms.

Contact: Simon Goodhugh 01483 252037

SITE NAME: **Rooswijk,  
Goodwin Sands,**

DESIGNATION: Protected Wreck Site

CONDITION: Generally unsatisfactory  
with major localised problems

TREND: Natural decline

OWNERSHIP: Private

The VOC (Dutch East Company) ship Rooswijk was built in Amsterdam in 1737 but stranded on the Goodwin Sands in 1739 while en route from the Texel to the East Indies. The site represents archaeological evidence for the practice of large-scale overseas commerce between the Netherlands and Asia during the eighteenth century. As with other sites in the Goodwins, archaeological material is at risk owing to mobile sediments causing periodic exposure.

Contact: Simon Goodhugh 01483 252037

SITE NAME: **Stirling Castle,  
Goodwin Sands**

DESIGNATION: Protected Wreck Site

CONDITION: Extensive significant problems

TREND: Significant decline

OWNERSHIP: Trust

PHOTO: © Seadive

One of twenty, third rate 70-gun warships, built 1678 at Deptford as part of Samuel Pepys' regeneration of the English navy. Like the Northumberland and the Restoration she was rebuilt at Chatham in 1699. All three ships foundered on the Goodwin Sands during the 'Great Storm' of 1703.

## MEDWAY (UA)

SITE NAME: **The Chapel of St Bartholomew,  
High Street,  
Chatham**

DESIGNATION: Listed Building Grade II\*, CA

CONDITION: Fair

OCCUPANCY: Vacant

PRIORITY: D (D)

OWNERSHIP: Private

Hospital Chapel since C12. Now vacant, but potentially for sale.

Contact: Tom Foxall 01483 252035

## PRIORITY (FOR BUILDINGS)

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

**D**  
Slow decay, solution agreed but not yet implemented.

**E**  
Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

SITE NAME: **Cliffe Fort,  
Cliffe**

Fort circa 1860. Fabric is derelict but stable due to massive construction. Remains of Brennan Torpedo Rail, said to be the best surviving example, are vulnerable. Surrounded by gravel pits.

DESIGNATION: Scheduled Monument

CONDITION: Very bad

OCCUPANCY: Vacant

PRIORITY: C (C)

OWNERSHIP: Company

Contact: Peter Kendall 01483 252038

SITE NAME: **Cooling Castle,  
Cooling**

A quadrangular castle with ruined fabric and in need of major repair. Includes C14 gatehouse repaired with English Heritage grant.

DESIGNATION: Listed Building Grade I, SM

CONDITION: Very bad

OCCUPANCY: Part occupied

PRIORITY: A (A)

OWNERSHIP: Private

Contact: Peter Kendall 01483 252038

SITE NAME: **Barn 30 yards south east of the manor,  
Upton Road (south side),  
Frindsbury Extra**

Very fine medieval barn, more or less redundant for agricultural use. Subject to fire damage.

DESIGNATION: Listed Building Grade I, CA

CONDITION: Very bad

OCCUPANCY: Vacant

PRIORITY: A (A)

OWNERSHIP: Private

Contact: Tom Foxall 01483 252035

SITE NAME: **Brompton Lines,  
Gillingham**

Landward defences to dockyard at Chatham, subsequently used in part as a pleasure ground for officers. Now cross Ministry of Defence owned land, housing and Brompton Barracks. Lower lines site now released to new owner. Discussions continue about management of retained MOD parts.

DESIGNATION: Scheduled Monument, CA

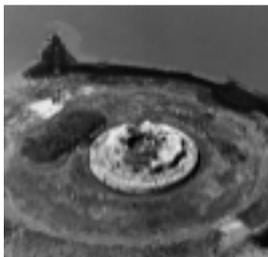

CONDITION: Poor

OCCUPANCY: Not applicable

PRIORITY: D (D)

OWNERSHIP: Government

Contact: Peter Kendall 01483 252038

SITE NAME: **Fort Darnet,  
Gillingham**

A Royal Commission fort circa 1860, in the Medway Estuary, washed by high tides.

DESIGNATION: Scheduled Monument

CONDITION: Very bad

OCCUPANCY: Vacant

PRIORITY: A (A)

OWNERSHIP: Private

Contact: Peter Kendall 01483 252038

SITE NAME: **No. 8 Machine Shop,  
Dock Head Road,  
Chatham Dockyard, Gillingham**

1840 former dry dock cover; later used as Machine Shop, now disused. Cladding removed and awaiting solution.

DESIGNATION: Listed Building Grade II\*

CONDITION: Poor

OCCUPANCY: Vacant

PRIORITY: C (C)

OWNERSHIP: Quango

Contact: Tom Foxall 01483 252035

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

### SITE NAME: Large univallate hillfort at Felday, Shere

DESIGNATION:	Scheduled Monument	CONDITION:	Generally unsatisfactory with major localised problems
PRINCIPAL VULNERABILITY:	Scrub / tree growth	TREND:	Declining
OWNERSHIP:	Private	CONTACT:	Simon Goodhugh 01 483 252037

### SITE NAME: Clandon Park, West Clandon

DESIGNATION:	Registered Park and Garden Grade II, also part in CA, 8 LBs
CONDITION:	Extensive significant problems
VULNERABILITY:	High
TREND:	Deteriorating
OWNERSHIP :	Mixed, multiple owners

Lancelot Brown designed Clandon's landscape park c1776-81. The house and garden are now owned by the National Trust but the park is privately owned. It is currently unsympathetically managed with many trees lost to decay, thus affecting the overall integrity of the design and the setting of the house. A recent application was made for business use of farm buildings. A joint owner approach to a conservation and management strategy is needed.

Contact: Charlotte McLean 01 483 252076

#### PRIORITY (FOR BUILDINGS)

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

## MOLE VALLEY

SITE NAME: **Ruins of Betchworth Castle, Reigate Road, Betchworth**

Late C17 ruined house built on site of medieval castle. Consolidation required. Emergency works required urgently. Some areas are in danger of imminent collapse.

DESIGNATION: Listed Building Grade II, SM

CONDITION: Poor

OCCUPANCY: Not applicable

PRIORITY: B (B)

OWNERSHIP: Local authority

Contact: Richard Massey 01483 252046

SITE NAME: **Brockham Lime Works, Brockham**

The remains include an eastern battery of eight kilns and a western battery of two. The eastern battery, originally built in 1870, comprises four pairs of linked flare kilns. The northern two pairs were modified to the Brockham patent, as was the western battery, and comprises the type site for this type of kiln. The kilns are in a very poor state of repair and suffer from water ingress and vegetation growth.

DESIGNATION: Listed Building Grade II, SM

CONDITION: Very bad

OCCUPANCY: Not applicable

PRIORITY: A (A)

OWNERSHIP: Trust

CONTACT: Simon Goodhugh 01483 252037

SITE NAME: **Ashtead Park, Ashtead/Headley**

DESIGNATION: Registered Park and Garden Grade II, also CA, 18 LBs, 1 SM

Begun as a C17 park, Ashtead was developed during the C18 and C19 by successive owners. In the 1920s the estate was sold as 51 lots. The historic estate is now in many ownerships making co-ordination of conservation action almost impossible. The main house and surrounds are a school, the road frontages have been developed for housing and northern part of the park is managed as public open space.

CONDITION: Extensive significant problems

VULNERABILITY: High

TREND: Deteriorating

OWNERSHIP: Mixed, multiple owners

Contact: Charlotte McLean 01483 252076

## REIGATE AND BANSTEAD

SITE NAME: **Alderstead (Merstham) Fort, Shepherd's Hill, Reigate**

C19 mobilisation centre, one of 13 constructed on the North Downs for the defence of London. The scheduling comprises the infantry fort and detached tool store. Tree growth and poor drainage are causing problems and the fort has no current use.

DESIGNATION: Scheduled Monument

CONDITION: Poor

OCCUPANCY: Vacant

PRIORITY: C (C)

OWNERSHIP: Private

Contact: Richard Massey 01483 252046

Note:  
If the priority category has changed since the 2008 register, the previous category is given in brackets.

PRIORITY: C (C)

OWNERSHIP: Private

Two late C17 walled gardens (one with raised terrace) and three pairs of gate piers located in the north west corner of the park. Formerly the gardens to the C17 house, burnt down in 1718. Used by the C19 as kitchen gardens for Hamstead Lodge. The walls are in joint ownership. Some sections have open joints. One of the gate piers has weed growth to the cornice. Parts are being repaired.

**PRIORITY (FOR BUILDINGS)**

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

**D**  
Slow decay, solution agreed but not yet implemented.

**E**  
Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

SITE NAME: **First Battle of Newbury,  
Enborne / Newbury / Spee**

DESIGNATION: Registered Battlefield

TREND: Stable

OWNERSHIP: Private

The first Battle of Newbury took place during the Civil Wars of the 1640s, on 20 September 1643. A large Parliamentary army attempting to march from Gloucester to the capital had its path blocked by King Charles's equally strong Royalist force. Fighting centred on the Parliamentarians' defensive position on Round Hill, west of Newbury. The battle was indecisive, but did not prevent the Parliamentarians from marching on towards London.

SITE NAME:	<b>The Dome Cinema, Marine Parade, Worthing</b>
DESIGNATION:	Listed Building Grade II*, CA
CONDITION:	Good
OCCUPANCY:	Occupied
PRIORITY:	F (F)
OWNERSHIP:	Trust

Early example of leisure complex, built 1911 as a roller skating rink and developed as a cinema in 1923. In need of extensive repair. The Worthing Dome and Regeneration Trust has secured Heritage Lottery Fund and English Heritage funding for repair and enhancement as a cinema, which is now nearly complete.

Contact: David Brock 01483 252044

## OFF WEST SUSSEX

SITE NAME:	<b>Hazardous, Bracklesham Bay,</b>
DESIGNATION:	Protected Wreck Site
CONDITION:	Extensive significant problems
TREND:	Significant decline
OWNERSHIP:	Government
PHOTO:	© Hazardous Project

A 54-gun Fourth Rate Ship of the Line, captured from the French in 1703 and refitted for the Royal Navy. Grounded on a reef in Bracklesham Bay during storm in 1706 while acting as escort for convoy en route from Chesapeake Bay, Virginia, to the Thames Estuary. Urgent investigation occurred after seabed levels dropped in 1984. Subsequent accretion and erosion have been recorded, including loss of exposed timbers in early 1990s. In 2006, changes to sediment patterns caused new areas of scouring. Recent studies have quantified environmental threats which are being used to mitigate further loss.

Contact: Simon Goodhugh 01483 252037

SITE NAME:	<b>Submarine HMS/m A1, Eastern Solent</b>
DESIGNATION:	Protected Wreck Site
CONDITION:	Extensive significant problems
TREND:	Significant decline
OWNERSHIP:	Private

Built by Vickers in 1903, the A1 is the first British designed and built submarine used by the Royal Navy. She sank for the second time in 1911 while operating under automatic pilot as a submerged target. The site has been subject to unauthorised access and a chain of shellfish pots was fixed by an unknown diver to the vessels' pressure hull causing abrasive damage.

Contact: Simon Goodhugh 01483 252037

## WINDSOR AND MAIDENHEAD (UA)

SITE NAME:	<b>Noahs Boathouse, Stonehouse Lane (Off), Cookham</b>
DESIGNATION:	Listed Building Grade II*
CONDITION:	Poor
OCCUPANCY:	Not applicable
PRIORITY:	A (A)
OWNERSHIP:	Private

1930, by Colin Lucas for his father; constructed of monolithic reinforced concrete with a flat roof. An early and pioneering example of Modern Movement architecture by one of the major figures in the movement. The building floods regularly and is derelict. The roof is leaking and the concrete is spalling.

Contact: Kathryn Davies 01483 252028

SITE NAME:	<b>Royal Mausoleum, The Home Park, Windsor</b>
DESIGNATION:	Listed Building Grade I, RPG Grade I
CONDITION:	Poor
OCCUPANCY:	Not applicable
PRIORITY:	C (C)
OWNERSHIP:	Crown

Mausoleum; internal decoration decaying through damp. Possible need to replace the copper roof, modify the rainwater discharge, and undertake fabric repairs, especially to the interior.

Contact: Elizabeth Moore 020 7973 3803

## WOKINGHAM (UA)

SITE NAME:	<b>Site of St Bartholomews Church, Arborfield, Arborfield and Newland</b>
DESIGNATION:	Listed Building Grade II, SM
CONDITION:	Very bad
OCCUPANCY:	Not applicable
PRIORITY:	A (A)
OWNERSHIP:	Religious organisation

Old parish church, now a roofless ruin. Originally C13 in flint and stone, with substantial probable C18 brick rebuilding. One wall partially standing, with fragments of later brick segments. Very overgrown. Risk of further collapse.

Contact: Chris Welch 01483 252027

### PRIORITY (FOR BUILDINGS)

**A**  
Immediate risk of further rapid deterioration or loss of fabric; no solution agreed.

**B**  
Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented.

**C**  
Slow decay, no solution agreed.

**D**  
Slow decay, solution agreed but not yet implemented.

**E**  
Under repair or in fair to good repair; but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use).

**F**  
Repair scheme in progress and (where applicable) end use or user identified; functionally redundant buildings with new use agreed but not yet implemented.

SITE NAME: **Infirmiry Stables,  
Arborfield Garrison,  
Arborfield, Finchampstead**

A specialised 'horse hospital' built 1911-12. The building is redundant by virtue of changes in Army practices (i.e. reduced cavalry activity).

DESIGNATION: Scheduled Monument

CONDITION: Very bad

OCCUPANCY: Vacant

PRIORITY: A (A)

OWNERSHIP: Government

Contact: Chris Welch 01483 252027

SITE NAME:

**Cropmark complex south west of St Patrick's Avenue, Charvil**

DESIGNATION:

Scheduled Monument

CONDITION:

Extensive significant problems  
i.e. under plough, collapse

PRINCIPAL VULNERABILITY:

Arable ploughing

TREND:

Declining

OWNERSHIP:

Private

CONTACT:

Simon Goodhugh 01483 252037

SITE NAME:

**Cropmark enclosure and pits north east of St Patrick's Avenue, Charvil**

DESIGNATION:

Scheduled Monument

CONDITION:

Extensive significant problems  
i.e. under plough, collapse

PRINCIPAL VULNERABILITY:

Arable ploughing

TREND:

Declining

OWNERSHIP:

Private

Simon Goodhugh 01483 252037

SITE NAME:

**Bearwood College, Arborfield and Newland**

DESIGNATION:

Registered Park and Garden Grade II\*,  
also part in CA, 3 LBs,

CONDITION:

Generally unsatisfactory with major localised problems

VULNERABILITY:

High

TREND:

Deteriorating

OWNERSHIP:

Corporate, multiple owners

Now a school and separate golf course, this C19 landscape park and woodland surrounds a Victorian country house standing on formal terraces, with gardens by William Sawrey Gilpin and Pulham. The school helped secure its future after WWI but subsequent and current development and management of the gardens and woodland, plus lack of specialist guidance and resources, challenges the integrity and survival of the historic landscape.
