# List of Figures

1.1	Wreck / gunnery target recorded on the foreshore at Drigg, Cumbria (scale = 1m).	2
1.2	Survey in progress at exposed inter-tidal peat bed at Cleveleys, Lancashire.	3
1.3	Location of the North West Rapid Coastal Zone Assessment Study Area.	8
1.4	Handheld GPS survey in progress on the earthwork remains at Skinburness, Cumbria	9
1.5	Structural remains at Barrowmouth Alabaster and Gypsum Mine, Cumbria	11
2.1	Cheshire Site Locations	18
2.2	Stable salt marsh at Burton Marsh in the Dee Estuary south west of Neston,	
	Cheshire, looking west.	20
2.3	Neston Old Quay: Red Sandstone seawall surviving to c1.8m in height.	22
2.4	Remains of Red Sandstone walling, possibly associated with Neston Old Quay,	
	remodelled and incorporated into garden walls. (scale = $1 \text{m x } 2\text{m}$ ).	23
2.5	Springing line of an arch, possibly showing the location of a former water channel	23
2.6	Handmade brick retaining wall with sandstone copings (scale = 1m).	24
2.7	Bombing decoy control building on the edge of Burton Marsh. Note ground	
	erosion at the base that may lead to subsidence (scale = $2m$ ).	25
2.8	Water-filled cut features in Burton Marsh interpreted as the remains of the Second	
	World War bombing decoy site for Garston Docks (scale = $1m$ ).	26
2.9	Possible further remains of the Second World War bombing decoy site (scale =	
	1m).	26
2.10	Possible remains of the Second World War bombing decoy site that appear to form	
	a small bridge (scale = 1m).	27
2.11	Erosion/stone robbing at Neston Old Quay (scale = 2m).	28
2.12	Location of sites surveyed at Neston	29
2.13	Location of sites surveyed on Burton Marsh	30
2.14	An entrance to Shell's Stanlow Oil Refinery and Petrochemicals Plant showing the	00
2.1 1	built-up nature of the area south of the Manchester Ship Canal.	31
2.15	<i>In-situ</i> medieval doorway (Ainsworth 2010, © English Heritage)	33
2.15	Remains of monastic drain (Ainsworth 2010, © English Heritage)	33
2.10	Possible arrangement of buildings at Stanlow Abbey overlaid on map of the modern	55
2.17	landscape and its historical development. (Ainsworth 2010, © English Heritage)	34
2.18	Victorian defences on the north and north-west end of Stanlow Point (© Robert	54
2.10	Edwards, Cheshire West and Cheshire Council)	36
2.19	Failing Victorian defences on the north and north-west end of Stanlow Point (©	50
2.17	Robert Edwards, Cheshire West and Cheshire Council)	36
2.20	Recommended survey area (Ainsworth 2010, © English Heritage)	37
2.20	Location of Stanlow Abbey at Stanlow Point	38
3.1	Merseyside Site Locations	41
	View of Hilbre Island (right) and Middle Eye (left) at low tide from the foreshore at	41
3.2	West Kirby.	43
3.3	Re-used punched-dressed sandstone masonry with part of a door jamb in the	43
5.5	foreground. (scale=1m).	46
3.4	Remains of red sandstone, 19 <sup>th</sup> -century lifeboat station.	47
<u>3.4</u> 3.5	Slipway running north-east of the lifeboat station. Showing damage caused by storm	4/
5.5	action in the early 2000s.	19
3.6	Iron steps recessed into the cliff-face to the east of the lifeboat station (scale = $1m$ ).	48 48
3.6		
3.7	View of Second World War, partially sunken, air-raid shelter, looking north.	49 50
3.8	Blocked entrance into Second World War air-raid shelter (scale = 1m).	
3.9	Location of sites surveyed on Hilbre Island	52
3.10	View of the Mersey Estuary at Bromborough Pool © Peter Craine.	53
3.11	Western stretch of the moat at Bromborough (scale = $1m$ )	55
3.12	Southern section of the moat filled with water.	56
3.13	Interior of Bromborough Moated Site showing the level of tree cover.	56
3.14	Example of a concrete footing for the (now removed) over-ground pipe network.	
	These are located throughout the north and east of the enclosure.	57
3.15	Pill boxes either side of the A41 at Bromborough Pool.	58
3.16	Location of sites surveyed at Bromborough Pool	60

	3.17	Tidal inlet at Bromborough Pool adjacent to Bromborough Pool Moated Site.	59
┣—	3.17	The River Mersey at Dungeon Point looking west towards Hale Head. ©Sue Adair.	59 61
	3.19	Remains of red sandstone and brick wharf looking west (scale = 1m).	63
	3.20	Dogleg in the course of the wharf, possibly indicating the juncture between two	0.5
	5.20	phases of construction. Looking west	64
	3.21	Partially exposed, circular brick-built salt chamber on the left of the photograph	
		with World War II anti-tank blocks ('dragon's teeth') re-deposited in front to	
		protect it from erosion. Looking east (scale = 1m).	65
	3.22	Location of sites surveyed at Dungeon Lane	67
	3.23	Eroding remains of sandstone quay and brick buildings, looking north-west	66
	3.24	Crosby beach featuring Anthony Gormley's 'Another Place' art installation, looking southwest.	68
	3.25	Exposed silts with preserved prehistoric footprint trails at Crosby Beach, looking east. © Mark Adams, National Museums Liverpool.	70
	3.26	Exposed silts on Crosby beach, looking south (scale = 1m).	70
	3.27	Location of silt and mud exposures surveyed at Crosby	72
	3.28	View of Formby Point showing the wide sandy beach backed by dune formations. Looking north.	73
	3.29	Very well defined human footprint on exposed silt at Formby Beach	75
<b> </b>	3.30	Ungulate footprints on exposed silt at Formby Beach (scale = 0.2m graduations).	75
	3.31	Vehicular damage to exposed silt containing prehistoric human and ungulate	
		footprints at Formby Beach. Looking south (scale = 1m).	76
	3.32	Recording of exposed human trails under the Sefton Coast Partnership Scheme.	76
	3.33	Foundations of the 18th century Formby lifeboat house looking north-east (scale =	
		1m).	78
	3.34	Bow or stern of a timber sailing vessel looking south-east (scale = 1m).	78
	3.35	Remains of a timber vessel. Looking south-east (scale = 1m).	79
	3.36	Remains of an iron and timber vessel or structure looking west.	79
	3.37	Location of sites surveyed at Formby Point	81
	4.1	Lancashire Site Locations	84
	4.2	View of the Ribble Estuary from Warton, looking south.	86
	4.3	Red deer hoofprints at Hesketh Out Marsh (© Alan Porter).	88
	4.4	Recording boulder clay exposures at Hesketh Out Marsh with Alan Porter (left).	88
	4.5	Surveying the earthwork remains of the possible medieval moated site at Warton	89
	4.6	Timber hulled vessel on the southern shore of the River Ribble, looking south.	90
	4.7	Section of post-medieval cobbled walling possibly associated with Bank Farm	91
	4.8	Concrete and earthen firing range butt at Lytham, looking northeast.	91
	4.9	Warton Airfield: NMR RAF 106G/UK/623 4160 10-AUG-1945. Copyright	
		statement: English Heritage (NMR) RAF Photography.	92
	4.10	Recording the remains of probable wartime paving at Lytham military camp.	93
	4.11	Concrete tanks with brick funnel drains at Warton Marsh. Probable Second World	_
		War sewage works on the northern shore of the Ribble Estuary at Warton Marsh	94
1	4.12	Brick structure with flat concrete roof, possibly associated with Second World War	<u> </u>
<u> </u>	4.4.0	sewage works.	94
	4.13	Concrete foundations marking the location of a demolished World War II Structure (5) on he northern shore of the River Ribble at Warton Marsh.	95
	4.14	Concrete foundations marking the location of a demolished World War II Structure	
		(13) on the northern bank of the River Ribble at Lytham Marsh.	95
	4.15	Concrete and steel hulled boat on the northern side of the Ribble Estuary, looking southeast.	96
	4.16	Ruinous foundations of Second World War gun emplacement, looking south	97
	4.17	Ruinous foundations of possible Second World War pillbox.	97
	4.18	Location of sites surveyed in the Ribble Estuary	100
	4.19	Location of sites surveyed in the Ribble Estuary	101
	4.20	Seafront at Cleveleys with promenade, stepped sea wall and groynes in the inter-	
L		tidal zone ©Rob Noble.	102
	4.21	Remains of timber vessel identified as the Abana 1874, looking southwest (scale =	
L		2m in background and 1m in foreground).	104
	4.22	Location of sites surveyed at Cleveleys	105
1	4.23	Pilling marsh looking west with the sea-dyke in the foreground.	106

4.25       Remains of large-scale shallow extraction in front of the sea dyke at Pilling, looking northwest.       1         4.26       Ferce-Ine incorrectly recorded as a post-medieval fishtrap in the Phase 1 aerial photography transcription, looking northwest.       1         4.27       Timber vessel-seastern bank (PRN:26927).       1         4.28       Two vessel-sevestern bank.       1         4.30       Timber vessel-western bank.       1         4.31       Four vessel-western bank.       1         4.32       Timber vessel-western bank.       1         4.33       Location of sites surveyed at Pilling Marsh       1         4.34       Location of sites surveyed in the Wyre Estuary       1         4.35       Coastal defences at Cockersand, looking southeast.       1         4.36       Standing remains of the 13 <sup>th</sup> century chapter house at Cockersand Abbey with earthwork remains of the cloister in the foreground, looking northeast.       1         4.37       Localised patches of erosion of exposed sandy soil above the top of the sea wall at Cockersand Abbey.       1         4.38       Concrete tips and tarpaulin and rock-facing on historical patches of erosion, looking north.       1         4.39       Sherd of burnt 13 <sup>th</sup> 14 <sup>th</sup> century Greenglaze Ware in a course light-grey fabric recovered from Cockersand Abbey.       1         4.40       Recording rub vart Obse

	E 1(7	Marsh, looking east.	334
	5.167	Possible remains of medieval saltworking site (184) on Skinburness Marsh, showing rectilinear pool with associated water channel, looking south (scale = 1m).	335
	5.168	Possible remains of a medieval saltworking site (174) on Anthorn Marsh, looking	555
	5.100	east	335
	5.169	Recording possible remains of a medieval saltworking site (175) on Anthorn Marsh,	000
		looking north (scale = $1m$ ).	336
	5.170	Water-filled pool, possibly being the remains of a medieval/post-medieval salt pan,	
		looking northeast.	337
	5.171	Bank of large post-medieval salt pan at Sea Dyke End Farm (130), looking	
		northwest	337
	5.172	Large banked, circular salt pan and associated water channel at Salt Coates (167),	
		looking north.	338
	5.173	Recording the large circular salt pan and associated water channels southwest of	220
	F 174	Newtown Arlosh (173), looking southwest. $(174) = 0.014$	338
	5.174	(a) Water-filled salt pan (171); (b) flat-topped spoil heap (170); and (c) water-filled	339
	5.175	depressions and channels (171) (scale = 1m). Remains of possible post-medieval fishing vessel at Skinburness (106), looking west.	340
	5.176	Remains of possible post-medieval fishing vesser at Skinburness (700), fooking west. Remains of possible post-medieval fishing weir or jetty at Skinburness (92), looking	540
	5.170	west (scale = $2m$ ).	341
	5.177	Remains of parallel stone alignment at Anthorn Marsh (176), looking northeast	341
	5.178	Remains of air gunners' range on the Grune Peninsula (scale = $2m$ ).	342
	5.179	Cumberland Machine-Gun and Anti-Tank Rifle Emplacement at Grune Point	343
	5.180	Second World War debris used as a flood defence on the Grune Peninsula, looking	
		southwest (scale = $2m$ ).	344
	5.181	Slit trench (94) adjacent to the pillbox (93) on the Grune Peninsula, looking	
		northeast	344
	5.182	Recording the Second World War trench network on the northeast end of the	
	-	Grune Peninsula, looking northwest (scale = 2m).	345
	5.183	Location of sites surveyed at Skinburness	347
	5.184	Location of sites surveyed from Border to Salt Coates	348
	5.185	Location of sites surveyed at Anthorn and Newtown Arlosh	349
	5.186	Shoreline west of Bowness-on-Solway showing a concrete and stone sea wall and	250
	E 107	upper shingle beach section.	350
	5.187	The remains of the Roman Road (defined by change in vegetation) running south from the Roman Fort of <i>Maia</i> in Bowness-on-Solway, looking northwest.	352
	5.188	Slight undulations in the field where the Roman Temporary Camp at Knockcross	552
	5.100	was mapped during the Hadrian's Wall NMP, looking south.	352
	5.189	Ridge or possible Roman Road visible in fields to the southeast of the temporary	552
	5.107	camp at Knockcross, looking west.	353
	5.190	Evidence of possible domestic-scale peat extraction at Cardonuck Marsh	354
	5.191	Evidence of possible domestic-scale salt working east of Bowness-on-Solway	354
	5.192	Eroding remains of Port Carlisle Quay.	355
	5.193	Remains of the Carlisle Navigation Canal at Port Carlisle (with the quayside in the	
		background), looking east (scale = 2m).	356
	5.194	Remains of the railway platform and associated buildings looking northwest	357
	5.195	Remains of possible industrial activity showing ruined Red Sandstone walling and	
		circular niche (scale = $2m$ ).	357
L	5.196	Remains of possible timber trackway at Glasson (scale = 1m).	358
L	5.197	Location of sites surveyed from Bowness to Port Carlisle	360
-	5.198	Monument to King Edward I on Burgh Marsh © Andrew Smith.	361
	5.199	Possible unrecorded section of Hadrian's Wall Vallum (217), looking east	362

5.200	Remains of possible medieval boundary bank in Burgh Marsh (scale = 1m).	363
5.201	Broad medieval ridge and furrow on Burgh Marsh, looking southeast.	364
5.202	Remains of possible salt working site on Burgh Marsh, looking west (scale = 1m).	365
5.203	Remains of possible salt working site on Burgh Marsh, looking west (scale = 1m).	365
 5.204	Recording the remains of a bombing range marker on Burgh Marsh, looking north.	366
5.205	Location of sites surveyed on Burgh Marsh	368
6.1	Peat site locations	372
6.2	Patchy vegetation in the upper inter-tidal zone at Hoylake (scale = 1m).	375
6.3	shows the relative position of the major morphological elements observed on the	
	Crosby foreshore on 8th February 2012. The vertical and horizontal scales are	
	exaggerated and based on field observation only, they are not meant to represent	
	measured distances or elevations. The dashed line represents an approximate mean	
	beach gradient.	376
6.4	Thinly inter-bedded silts and sands at Crosby (scale = $1m$ ).	377
6.5	above left, shows details of organic rich palaeosol in section through Formby dunes;	
	above right, illustrates the lateral continuity of the same palaeosol (scale = 1m).	378
6.6	above left, typical exposure of peats in the inter-tidal zone at Cleveleys; above right,	
	an example of a large <i>in situ</i> tree stump at Cleveleys (scale = 1m).	379
6.7	Section above shows the relative position of the major morphological elements	
	observed on the Cleveleys foreshore on 9th February 2012.	379
6.8	Location of samples taken at Cleveleys	380
6.9	Tidally-laminated sediments exposed in saltmarsh channels at Sunderland Point.	381
6.10	Idealised section across the beach at Heysham.	382
6.11	View across the Heysham shore from the coastal path.	382
 6.12	Core P005 from foreshore at Heysham.	383
6.13	, ,	384
	Location of samples taken at Heysham	304
6.14	This cross section shows the relative position of the major morphological elements	
	and the main late-glacial units observed on the western Walney foreshore at grid ref.	205
< 1 F	SD 18859 65232 in March 2012.	385
6.15	above left, typical poorly-exposed organic sediments amongst cobble material on	
	western side of Walney Island (scale = 1m); above right, cored sequence through	• • • •
	clastic and organic layers, western shoreline, Walney Island.	386
 6.16	This composite log is based on cores P012 & P013 on western Walney foreshore.	386
6.17	Percentage Pollen record from Walney.	387
6.18	Location of samples taken on Walney Island	388
6.19	Typical section through mid-late Holocene fluvial sediments at Annas Mouth (scale	
	= 1m).	389
6.20	Section through the inter-tidal zone at Annas Mouth	389
6.21	above right, exposure of organic-rich deposits on foreshore, Annas Mouth.	390
6.22	Core through mid-late Holocene foreshore sediments at Annas Mouth (SD 07641	
	89085).	391
6.23	Pollen record at Annas Mouth	392
6.24	Location of samples taken at Annas Mouth	393
6.25	above left, Dune section at Drigg showing grey silts left foreground and overlying	575
0.25	peats to the right; above right, Detail of main peat sequence overlying till at this	
	point, rather than silts (scale = $1m$ ).	395
6.26	Summary section through dune sequence at Drigg, Cumbria (site P011), based on	393
0.20	composite of a number of adjacent sections, much of the area covered by vegetation	
	often making precise relationship between separate units difficult to establish	205
6.07	laterally.	395
6.27	Location of samples taken at Drigg	396
6.28	Pollen record through the Drigg coastal section.	397
6.29	Top left, view to north following main exposure of inter-tidal peats; top right,	
	example of large surface timber; bottom left, inter-tidal silts eroding in the lower	
	zone; bottom right, small section cut through the St Bees peat horizon for pollen,	
	macrofossil and <sup>14</sup> C sampling.	398
6.30	Section shows the relative position of the organic and clastic sediments exposed on	
	the foreshore at St Bees, Cumbria in March 2012.	398
6.31	Cores through the foreshore at St Bees.	399

6.33	Interbedded sands and gravels forming cliffline at Beckfoot	401
6.34	thin 2-4 cm peat (immediately below 10pence coin) on Beckfoot foreshore, with	
	inter-tidal clays above forming a pedestal protected by an overlying tree trunk.	402
6.35	Location of samples taken at Beckfoot	403
7.1	Exposed laminated silt deposits bearing ungulate hoofprints damaged by vehicular	
	action at Formby Beach, looking southeast (scale = 1m).	423
7.2	View of the area of Beckfoot cemetery in April 2012 showing machine scouring and	
	subsequent slumping of material from above (netting is in place to deter nesting	
	birds).	426
7.3	Exposed eroding silt and muds containing ungulate hoofprints and faunal remains	
	at South Walney (scale = 1m) (© David Coward).	428
7.4	View of the eroding western section of Ravenglass Roman Fort in March 2012, the	
	remains of a wall in the foreground is allegedly a retaining wall for the fort that was	
	in use $c.30$ years ago (scale = 1m).	430
7.5	View of the eroding cliff face at Aldingham Motte and Bailey, the motte is directly	
	above the person shown.	433
7.6	View of the eroding saltmarsh around the standing remains of the chimney at Jenny	
	Brown's Point.	435
7.7	Localised defences at Crosscanonby saltworks, erected to protect these industrial	
	remains in 1996 and currently working effectively against erosion.	437
7.8	Eroding dune face at North Walney containing lithic scatters and possible hearth	
	site, together with eroding silt deposit on the shoreline (scale = 1m) (© David	
	Coward).	438
7.9	Eroding dune face at Drigg containing the partially excavated remains of a possible	
	burnt mound and an extensive peat deposit.	440
7.10	Inter-tidal stone-built fish trap at Nethertown.	443

#### List of Tables

1.1	List of archaeological sites or areas targeted as part of the Phase 2 survey	12
1.2	List of peat and 'submerged forest' sites targeted as part of the Phase 2 Survey.	15
2.1	Sites identified as potentially under threat of erosion in Cheshire.	19
3.1	Sites identified as potentially under threat from current or future coastal erosion in Merseyside.	42
3.2	Summary of sites recorded during the Phase 2 archaeological survey	82
4.1	Sites identified as potentially under threat from current or future coastal erosion in Lancashire.	85
4.2	Sites recorded during Phase 2 within the Ribble Estuary.	98
4.3	Summary of sites recorded in Lancashire during the Phase 2 archaeological survey.	165
5.1	Sites identified as potentially under threat from current or future coastal erosion in	
	Cumbria.	168
5.2	Sites recorded during Phase 2 surveyed on Walney Island	227
5.3	Sites recorded as part of the Phase 2 survey in Skinburness and Moricambe Bay.	345
5.4	Summary of sites recorded in Cumbria during the Phase 2 archaeological survey.	369
6.1	List of pollen samples recovered during this study for further analysis. All samples	
	have been submitted for radiocarbon dating, the results of which will be incorporated	
	into this report once available.	372
6.2	Pollen record (counts) from Cleveleys foreshore peats	378
6.3	Pollen record through peat at St Bees.	392
6.4	Pollen counts for Beckfoot sample P014	394
7.1	Prioritised list of sites recorded during NWRCZA Phase 2.	412
7.2	Prioritised list of sites recorded during NWRCZA Phase 2.	412

#### Acknowledgements

The production of this report has involved the input of a large number of people. I should like to express my special thanks to my colleagues at **Archaeological Research Services Ltd**., namely Clive Waddington, David Knight, Jim Brightman, Karl Taylor, Paul Flintoft, Kate Mapplethorpe and Sally Smith, who all provided invaluable assistance throughout the completion of this project.

I am also most grateful to Dr Ian Boomer of Birmingham University for his assistance with the palaeoenvironmental sampling and production of Chapter 6 of this report and also to Emma Hopla of Birmingham University for undertaking the pollen analysis. Thanks are also due to Ruth Leary and Gwladys Monteil for their analysis of pottery recovered from Ravenglass Roman Fort

Other people who have supplied material assistance and good advice throughout include: English Heritage: Peter Murphy, Sue Stallibrass, Jennie Stopford, Mike Collins, Peter Horne, Paul Bryan, Peter Marshall and David Gander Environment Agency: Nick Hardiman and Dan Haigh (for NCERM data) National England: Christine Hopwood-Lewis Cheshire Archaeology Planning Advisory Service: Jill Collens and Robert Edwards Merseyside Archaeological Service: Sarah-Jane Farr Lancashire County Council: Peter Iles and Ken Davies Lake District National Park Authority: John Hodgson, Holly Beavitt-Pike and Eleanor Kingston Cumbria County Council: Richard Newman, Mark Brennand and Jo Mackintosh South Walney Nature Reserve: Trish Chadwick Liverpool Museums Archaeology Service: Mark Adams and Ron Cowell Solway AONB: Brian Irving Arnside and Silverdale AONB: Lucy Barron

The project team was assisted in the field by local archaeologists who gave freely of their time and knowledge and provided several key insights into particular aspects of the coastline. These were David Coward, on Walney Island, the Duddon Estuary and Drigg, Clifford Jones, on Brighouse, Ravenglass and Drigg, Chris Anyon of the Dee Estuary Wildfowlers, at Burton Marsh, and Alan Porter on Hesketh Out Marsh. Rod Highley also drew attention to the remains of Hest Bank Wharf.

David Cranstone made available his study of the salt making industry in the North of England and Gordon Robert provided his published paper on the footprints at Formby Point as well as commenting on the draft Phase 2 reports for Formby and Crosby. Oxford Archaeology North also offered advice and provided their reports on work undertaken in Saltom Bay and Beckfoot. And finally Leonard Watson provided Lancaster University's report on works carried out at Drigg.

Access to sites located on private land was provided by Major Paul Evenson at the MOD range on Burton Marsh, Ian Marrs at the QinetiQ weapons testing facility at Eskmeals, and Mike Baker of Hadrian's Wall Heritage Ltd for at fields around Maryport Roman Fort If you require an alternative accessible version of this document (for instance in audio, Braille or large print) please contact our Customer Services Department: Telephone: 0870 333 1181 Fax: 01793 414926 Textphone: 0800 015 0516 E-mail: <u>customers@english-heritage.org.uk</u>
